

"Croston Cactus"

2007 Plant List Terms

43 Southport Road Ecclestone CHORLEY

Lancashire PR7 6ET

Tel: 01257 452555

EMAIL: sales@croston-cactus.co.uk

Please note! We do not sell wild collected cacti!

REVISED PRICING FOR 2007! For this season we have changed the letter coding we used previously and now include suggested pot sizes along with the price of the plants. Our plants are between 3 and 15 years old.

POSTAGE - Postage and packing is extra - orders up to £10.00 - £2; up to £20.00 - £3.50; up to £35.00 - £4.50; up to £50 - £7.50, up to £75 - £9.50, over £75 check with us for postage rates. If including heavy plants, please check with us first as this can greatly increase postage costs.

We usually send orders by First Class letter post unless very heavy. If you require next day delivery, please contact us for PO "Special Delivery" prices.

MINIMUM ORDER VALUE – £5 for UK, £20 for other EEC countries. EEC customers outside the UK should contact us for postage charges.

PAYMENT – May be made by cheque or postal order, crossed and made payable to "JOHN HENSHAW"

CREDIT CARDS - Please note we are only able to process credit card payment for orders made on line. We use PayPal to handle all secure credit card transactions. We do not view any card details, your payment request is forwarded to the PayPal web site where you can chose to pay using your card, or PayPal account if you are already a PayPal account holder. This is a very secure method of payment.

ORDERING BY EMAIL OR TELEPHONE - We recommend that you query availability of plants prior to ordering as some items are in very short supply. If you wish to place an order by telephone, we will be pleased to hold the plants for 7 days pending arrival of your cheque/Postal Order.

For express service & customers wishing to order by email, please email your request to sales@croston-cactus.co.uk and indicate that you wish to pay on line. We will confirm the availability of plants in your order and postage costs by return email. The email will have a "Pay Now" button that will take you to the PayPal web site for you to make your payment. We will normally post the plants within 24 hours of receiving confirmation from PayPal of your payment. If you need make changes to the order before payment just email us back with revisions.

YOUR MAIL ORDER RIGHTS - We attempt to comply with the EU "Distance Selling Directive" & OFT "Guidelines for shopping from home" Plants are perishable so can not be guaranteed indefinitely, but if any arrive from us in an unsatisfactory condition, return immediately for a refund or replacement. We usually aim to post orders within 24 hours of receiving your cheque or postal order. *If you have not received your plants within 10 days of sending payment for your order*, please contact us by email or telephone.

We may occasionally delay sending just prior to bank Holidays or during frosty weather.

NURSERY VISITS 2007 - Our 20ft x 42ft sales & 75x15ft display and propagating glasshouses are open to personal customers. The nursery is Monday-Sunday but by appointment only. If you intend visiting, a prior telephone call or email will confirm and may save you a wasted journey. We are usually open Bank Holidays. The nursery is situated on the A581 just east of the B5253, 15 minutes from junction 27 or 28 of the M6, or junction 8 of the M61. Telephone or email us for more detailed directions, or information on local amenities.

John L. Henshaw September 2007

Species	Description	Pot Size	Price
<u>ARIOCARPUS</u>	"Living Rock" plants - slow growing & much sought after	cm	GBP
agavoides (<i>Neogomesia</i>)	Narrow dark green tubercles. Flowering size plants now 10 years old.	6.5	£4
bravoanus	Similar to A. fissuratus but erect dark green tubercles. 6 yr. old seedlings.	6.5	Sold out!
fissuratus	Thick dark green tubercles, develops woolly centre with age. 9 years old.	6.5	£4
hintonii	Similar to A. fissuratus, triangular tubercles become shorter with age.	6.5	£10
kotschoubeyanus	Rosette shaped plants, tiny triangular tubercles - flowering size.	6.5	£4
retusus SB68	Nice, longer tubercled form of A. retusus, 9 year old plants.	6.5	£4
retusus var. furfuraceus	Fat grey tubercles with roughened surface, 9 year old plants.	6.5	£4
scaphirostris (<i>scapharostrus</i>)	Warty, dark red/green tubercles. Slow growing sp. from Rayones, Mexico.	6.5	Sold out!
trigonus	Olive green tubercles, sharply pointed at the tips, large yellow flowers, 9 years old.	6.5	£5
<u>ASTROPHYTUM</u>	Interesting plants, most are covered with white "spots"		
asterias	"Sand Dollars" - flat to dome shaped plants. Yellow flowers, red centre.	6.5	£3
asterias "Super Kobuto"	Covered with variable white markings. Yellow flowers, red centre.	6.5	£3
capricorne	Long twisted black spines, pale green spotted body. Flowering size.	6.5	£2
capricorne var. crassispinum	Almost bare body, much thicker, stronger spines. Very nice form.	6.5	£2
caput-medusae (digitostigma)	Looks nothing like an Astrophytum except for the flowers! Grafted	6.5	Sold out!
myriostigma	Flowering size, "Bishops Cap" Some larger plants available @ £17.50	6.5	£2
myriostigma v. coahuillense	Flowers yellow with a red centre. Very white, flowering size plants.	6.5 : 8.5	£2 : £3
myriostigma v. nudans	Glossy green 5 ribbed plants, no white spots. Flowering size plants.	6.5 : 8.5	£2 : £3
myriostigma fa."onzuka"	Mostly 4 ribbed, dense white flecked plants with interesting markings.	6.5	£4
myriostigma v. quadricostata	Square plants for square pots! 4 ribbed plants, a few larger ones available @ £6.50	6.5 : 11	£2 : £3
"quadri-nudans"	Green 4 ribbed plants, no white spots. Unusual! Also some large ones @ £17.50	6.5	£3
ornatum	Nice white spotted form with strong brown/yellow spines	6.5 : 8.5	£2 : £3
<u>AZTEKIUM</u>	Unusual shaped plants thought to be reminiscent of Aztec art		
hintoni (<i>grafted-£6.50</i>)	Largest growing Aztekium form, grafted, ex 6.5cm pots.	6.5	£6.50
ritteri (<i>grafted</i>)	Flowering size plants just starting to cluster, on short Harrisia stocks.	6.5	££6.50
<u>BLOSSFELDIA</u>	A true miniature, this species from northern Argentina		
lilliputana (<i>Grafted</i>)	Miniature plants, tiny creamy/white flowers, can be difficult unless grafted.	6.5	Sold out!
<u>COPIAPOA</u>	Chilean plants - chalky body coloured ones are the most popular		
bridgesii L829	Young plants have red bodies, straight straw coloured spines.	8.5	£4
haseltoniana	Young plants with golden bodies/spines, become chalky with age.	6.5	£3
hypogea "lizard skin" form	Unusual textured skin form, red to olive/green body, yellow flowers.	6.5	Sold out!
lembkei	Bodies become chalky with age. Young plants dark green, black spines.	6.5	£3
SP. AWC796 (coquimbana)	Fat red/green bodies, most with curved black spines.	8.5	£4
<u>CORYPHANTHA</u>	Compact plants from Mexico & USA		
andreae	Dark glossy green body, large yellow flowers.	6.5 : 8.5	£2 : £3
bisbeeana (<i>Escobaria</i>)	Globular plants untidy pink coloured spines, Cochise Co. Arizona.	6.5	£3
cornifera	Clustering plant from the Big Bend area of Texas.	6.5	£3
hendricksonii (<i>Escobaria</i>)	Narrow, columnar plants, clustering with age. Uncommon.	6.5	£2
mcdougallii (<i>Ortegocactus</i>)	Fat blue/green body, black spines, yellow flowers. Grafted.	6.5	£5
nelliae (<i>Escobaria</i>)	Pretty clustering miniature, red & straw coloured spines, pink flowers.	6.5	£2
rigida (<i>Escobaria</i>)	Clustering stems, dense glassy white spines, flowers purple.	8.5	£4
sneedii (<i>Escobaria</i>)	Dwarf plants making clusters of many heads, dense white spines.	6.5	£2
varicolor (<i>Escobaria</i>)	Small globular plants, tight spination, pale pink flowers.	6.5	£2
vivipara (<i>Escobaria</i>)	Globular spiny plants, large pink flowers. Cold tolerant, the most hardy!	6.5	£2
<u>DISCOCACTUS</u>	Mostly Brazilian plants - need high winter temperatures.		
albispinus (zehntneri)	Untidy long straw coloured spines, scented white flowers.	6.5	£4
chrysalophyllus	Dark green, fat bodies plants, black spines, scented white flowers.	8.5	£6
estesviesii (<i>grafted</i>)	Glossy green body - strong curved black spines, scented white flowers.	8.5	£6

ferricola (<i>grafted</i>)	Glossy green body – fine curved brown spines, scented white flowers.	8.5	£6
horstii (<i>grafted</i>)	2cm diameter purple/black bodies – tiny black spines, various stocks.	6.5	£7.50
ECHINOCACTUS	Generally large growing species, a few smaller choice ones		
grusonii	Popular “Golden Barrel” - more unkindly “Mother in Law’s seat”! Prices/sizes from	10.5=>	£4.50
grusonii v. alba	Spines are a glassy white. Most of our plants are clusters. Prices/sizes from:	10.5=>	£4.50
horizontalonius	Smallest and most attractive. Blue/grey bodies & stout spines.	6.5	Sold out!
ingens	Giant barrel cacti in habitat, blue grey bodies with red bands.	6.5	£2
platyacanthus	Grey bodies, black spines. Areoles almost continuous on large plants.	6.5	£2
texensis	Flat grey green body, straw coloured spines, pink flowers. Tender!	12	£6.50
ECHINOCEREUS	Usually clustering, from miniatures to large clumps over 1 meter		
adustus	Short erect stems covered in white pectinate spines, black centrals.	8.5	£4
chloranthus	Small growing plants, dense white spination, brown flowers.	6.5	£2
davisii	Tiny, dwarf plant. Black & white spines, green flowers. Flowering size.	6.5	£2
engelmannii J LH950812	A northern form with black & white spines, may be hardy.	6.5	£2
fasciculatus	Form of E. engelmannii from central Arizona, golden spines.	6.5	£2
fendleri var. eremiticus	Form with brown/white spines. Not a lot different to normal form!	6.5	£2
fendleri SB350	Nice black & white spines on a typical E. fendleri stem.	8.5	£3
gentryi Lau 087	“Cucumber” - like stems, tiny spines, flowering size plants.	8.5	£3
knippelianus	Fat green body, big taproot, bristly spines. Pink flowers from the sides.	6.5	£2
knippelianus v. krugeri	Fat green body, soft bristly spines, flesh-coloured flowers from centre.	6.5	£2
knippelianus v. reyesii	Fat green bodies, stiffer spines. Larger, deep pink flowers from centre.	6.5	£2
morricallii	A spineless E. scheerii type. Flowers form low down on pale green stems.	6.5	£2
nivosus	Clustering stems covered with glassy white spines - nice!	6.5	£3
palmeri	Likened to goat droppings! Tiny stems with long black spines.	6.5	£2
pectinatus v. rubra	Stunning red spines on our larger flowering sized plants. Easy to flower	6.5 : 8.5	£2 : £3
pulchellus	Small, flat growing plants, short radial spines, pink flowers, nice! Few!	8.5	£4
pulchellus v. sharpii	White flowered, short bristly spines, more care with watering required.	6.5	£3
rosei (<i>Oro Grande form</i>)	Easy flowering plants from a population with many flower colours.	6.5 : 8.5	£2 : £3
schwarzii Lau 1305	Pectinate radial spines with longer brown centrals, pink flowers.	8.5	£3
stramineus J LH950764	From south of Samalayuca Mexico. Glassy white spines, robust stems.	8.5	£3
triglochidiatus J LH950825	Northern form, quite hardy, typical spination, cluster forming plants.	8.5	£3
triglochidiatus inermis	Totally spineless form! Much kinder on the fingers when re-potting!	6.5 : 8.5	£2 : £3
viridiflorus	Nice dark brown spined plants. This form grows to about 10cm high.	6.5	£2
weinbergii	Looks like a more spiny E. pulchellus, flowers and growth larger.	8.5	£4
EPITHELANTHA	Mostly miniatures with pink flowers & red fruits		
micromeris	From near Mud Mountain, New Mexico. Coarse white spines, pink flowers.	6.5	£3
FEROCACTUS	Small to large growing “Barrel Cacti” from Mexico & SW USA		
emoryi	Nice blue bodied plants, red & white spines. Large plants ex 21cm bowls.	21	£20
fordii DJF7	From Baja California. Flowers at a smaller size than most Ferocacti.	8.5	£3
glaucescens v. inermis	Unusual clustering plants, 0 to 1 yellow spine on pale green body.	12.5	£8.50
gracilis	Bold red spines, dark green, plant body. Smaller growing.	8.5	£3
herreriae	Large growing plant, strong re-curved brown spines, yellow flowers.	6.5 : 8.5	£2 : £3
hystrix	Pale grey/green body, strong, long, red & white spines. Can grow to 1 mtr. high!	8.5	£3
latispinus	Flat growing, broad red spines. Some larger plants available @ £6.50 ex 10.5cm	8.5	£3
latispinus v. spiralis	Taller growing than normal, strong red, hooked spines, large heavy plants!	21	£25
macrodiscus	Flat growing plant with acute ribs. Flowering size plants @ £12.50.	8.5	£3
rectispinus	Extremely long central spines on typical Ferocactus body.	12.5	£8.50
robustus	From Tecomachalco Mexico. Makes small heads and clusters profusely.	8.5	£3
schwarzii	Dark green body with short yellow spines & acute ribs.	10.5	£4.50
townsendianus	Blue/green bodied plants with stout, short red spines.	6.5	£2

viridescens	Southern California & Baja. Produces green flowers while still small.	6.5	£2
<u>FRAILEA</u>	South American miniatures, flowers set seed without opening!		
asterioides	Miniature plants, purple bodies, tiny black spines, yellow flowers.	6.5	Sold out!
<u>GEOHINTONIA</u>	Relatively recent discovery from Mexico. Monotypic genus		
mexicana	Many acute ribs, tiny white spines, purple flowers. On own roots.	6.5	£6.50
<u>GYMNOCACTUS</u>	Closely allied to Turbinicarpus but generally more spiny		
beguinii	Small plants, dense black & white spines, large purple/pink flowers.	6.5	£3
beguinii sp. de agua nueva	Similar to the above but spines shorter and thicker.	6.5	£3
gielsdofianus	Blue bodies, black spines, white flowers. Interesting little plants.	6.5	£3
saueri	Small plants with stiff black & white spines, cream coloured flowers.	6.5	£3
subterraneus var. Zaragosae	Zaragosa, Nuevo Leon. Pink/yellow-white unusual bi-coloured flowers. Few!	6.5	£4
viereckii spec Lau 1159	Lots of dark pink flowers on small spiny plants. Easiest to grow!	6.5	£2
ysabellae	Globular, golden spined plants growing to 10cm. Pink/white flowers.	6.5	£4
<u>GYMNOCALYCIUM</u>	South American group, mostly small flattened plants		
bruchii v. brigittae P214	Tiny grey bodied plants with fine white spines.	6.5	Sold out!
castelanosii P80a	Pale green body, rounded ribs, long straight spines.	6.5	£2
hamatum	Strongly tuberculate, brown bodies, curved spines.	8.5	£3
mazanense	Bronze/green bodies, straw coloured spines.	6.5	£2
mihanovichii	Purple/red bodies, white spines, pink flowers.	8.5	£3
multiflorum	Fat, pale green bodies, straw coloured flowers. Large growing species.	10.5	£4.50
piltzorum P28	Flattened brown body with erect stiff spines.	6.5	£2
ragonesii	Dwarf brown bodies, tiny spines, flesh-coloured flowers, slow!	6.5	£2
saglione	Large rounded tubercles, long curved spines. Grows to football size!	6.5	£2
<u>HAMATOCACTUS</u>	Probably should be included with the Ferocactus group		
hamatacanthus	Long spines on a globular plant. Can reach barrel cactus size!	8.5	£3
<u>LEUCHTENBERGIA</u>	Confuses many beginners with its un-cactus – like appearance		
principis	Pink/blue "fingers" with long papery spines. Huge yellow flowers.	6.5 : 8.5	£2 : £4
<u>LOBIVIA</u> (inc. Chamaecereus)	Medium to small growing cacti. Free flowering & easy cultivation.		
bruchii	Plants forming large "barrels" with bright yellow spines.	6.5	£2
dobeana	Clustering Echinopsis type, brick red flowers.	6.5	£2
echinopsis cristate	Fat, contorted stems with a dense coating of brown spines.	10.5	£6.50
sylvestrii cristate	Stems start normal but then crest at the tips. Easy flowering form.	6.5 : 8.5	£2 : £3
sylvestrii "Yellow Bird"	Probably a hybrid. Stems more robust, flowers yellow. Easy!	8.5	£3
sylvestrii hybrid #1	Possibly a Lobivia hybrid. Robust stems, red flower. Easy flowering!	6.5	£2
schieliana WR207	Dark green clustering plants with dense, straw coloured spines.	8.5	£3
subnudans (Echinopsis)	Fat green bodies with large woolly areoles, flowers at small size.	6.5 : 8.5	£2 : £3
X "strawberries & cream"	Pretty little hybrid with bi-coloured flowers! BMCD1017.	6.5	Sold out!
<u>LOPHOCEREUS</u>	Columnar plants growing to 2 meters tall		
schottii monstrose	"Totem Pole" Totally spineless and non-existent ribs! Approx. 45cm tall.	15	£30
<u>LOPHOPHORA</u>	The Czech. Society has published an interesting booklet on this group		
echinata diffusa	Green body, white to cream coloured flowers. Queretaro form	6.5	£3
fricci	Larger flowers, sometimes red. May be the same as L. w. decipiens	6.5	Sold out!
koehresii	Dark, more tuberculate body, thin neck, different flower & fruit	6.5	£6
williamsii	The common peyote. Some of our plants are just starting to flower.	6.5	£4
williamsii caespitosa	Form that clusters as a tiny plant. 4 yr. old plants, some flowering size.	6.5	Sold out!
williamsii decipiens	Larger, more rounded blue bodies, large pink flowers	6.5	£3
<u>MAMMILLARIA</u>	Miniature plants to large clustering sorts, generally free flowering		
beneckei	Clusters of small stems which detach easily – not good to pack!	6.5	£2
bombycina	Clustering, white radial spines & hooked red centrals, pink flowers.	10.5	£6.50
campotricha "mme. marnier"	More attractive form with shorter, yellow, strongly curved spines.	6.5	Sold out!

candida	Globular plants densely covered in pink & white spines, pink flowers.	8.5	£3
celsiana	White radial spines, yellow centrals. Plant globular while young.	6.5	£2
coahuillense (P. schwarzii)	Small flattened plants, mostly subterranean. Cream/pink flowers at 1cm.	6.5	Sold out!
dixanthocentron	Long yellow central spines, red flowers. Nice tidy plants.	10.5	£6.50
echinaria	Small plants similar to M. elongata but more untidy spines.	6.5	£2
elongata cristate	Entwining, caterpillar like stems covered with tight yellow spines.	8.5	£3
formosa	Flat, disk like plants with lots of wool in the axils & pink flowers.	6.5	£2
goodridgii	Small growing plants, brown hooked spines on yellow/green body.	6.5	£2
haageana	Like a more robust form of M. elegans, nice purple/red flowers.	8.5	£3
herrerae albiflora	Tiny white spined columns. Tap rooted form from Pozos Mexico.	6.5	Sold out!
hidalgensis var. inermis	Unusual, pale green spineless plant, dark red flowers!	6.5	Sold out!
lalui	Short, white spined form, many deep pink flowers.	6.5	£2
lenta	Flat, white spined plants, pink flowers. Slow growing, clusters with age.	6.5	£3
lewisiana	Long, thin spines making a "birds nest" on top of the plant! From Baja.	6.5	£2
longimamma (<i>Dolichothele</i>)	Fat green tubercles with thin spines at the tips. Huge yellow flowers.	6.5	£2
marksiana	Nice globular plants with bright yellow spines & flowers.	6.5 : 8.5	£2 : £3
matudae	Taller growing plant, olive green body with pectinate brown spines.	6.5 : 8.5	£2 : £3
matudae cristate	Fat contorted stems, attractive spines, ex 12cm bowls.	6.5	£3
mystax	Long intertwined spines on mature plants. From Tehuacan Mexico.	8.5	£3
napina	Big dark red flowers. Short, glassy spines, large taproot.	6.5	£4
nejapensis	Globular, clustering with age. Long white spines, yellow flowers.	6.5 : 8.5	£2 : £3
parkinsonii	Eventually clustering, stems covered with stiff white spines.	6.5	£2
pectinifera (<i>S. pectinata</i>)	Beautiful white spined plants on own roots. Another "golf ball"!	6.5	£3 : £4
perez de la rosa	Pretty, pink flowered plants. White radial spines, hooked black centrals.	6.5	£2 : £3
plumosa	Clusters of stems covered in dense soft white spines, white flowers.	8.5	£3
priesnitzii	Solitary, dark glossy green body, white tipped, brown spines.	8.5	£3
pseudoperbella	Small globular plants, short dense white radials, black centrals.	6.5	£2
rekoii form (auriflora?)	Typical appearance but bright yellow flowers!	10.5	£5.50
saboae	Miniature heads with fine white spines & large pink flowers.	6.5	Sold out!
scheideana	Tap rooted. Golden yellow spines, dark green body, yellow flowers.	6.5 : 8.5	£2 : £3
schumanii (<i>Bartschella</i>)	Bluish bodies, hooked black spines, large pink flowers.	6.5	£2
sempervivi	Densely tuberculate body, black spines, lots of wool in the axils	8.5	£3
senilis (<i>Mammilopsis</i>)	Fine covering of hooked white spines. Large red flowers. Cold hardy.	16	£12.50
senilis albiflora	Just a few of the white flowered form available.	6.5	Sold out!
spinosissima cristate	Contorted stems covered with fine white spines. Ex 16cm bowls.	16	£9.50
standleyi	Solitary, to 10cm diameter. Red flowers from wooly axils.	8.5	£3
tepexicensis	Small globular plants with a covering of brown spines. Pink flowers.	6.5	£2
"Uno Pico"	From a M. magnifica sport, solitary central spines, red flowers.	6.5	£2
MELOCACTUS	Cephalium forming plants from Cuba & Central America		
azureus	Pale blue bodied plants with red spines – heavy! Few! Ex 21cm bowls	21	Sold out!
matanzanus	Dwarf Cuban Melocactus. Flowering sized plants, orange cephalium.	12	Sold out!
NEOPORTERIA	Incl. Thelocephala, Neochilenia, Pyrrhocactus. AWC = Alan Craig col. nos.		
clavata grandiflora	Attractive, dark red/brown bodied plants, stiff erect golden spines.	8.5	£3
chilensis AWC351, AWC555	From 2 locations, red/green bodied plants, short, stiff yellow spines.	8.5	£3
coimasensis AWC24, 553	Various locations, Green bodied plants dense bristly straw/black spines.	8.5	£3
esmeraldana FK775	Large tap roots, almost black body, small orange/brown spines.	6.5	£2
krausii	Pretty, purple bodied plants with white, pectinate spines.	6.5	£3
mammilarioides AWC217	Dark red, tuberculate body, straw to brown spines.	8.5	£3
multicolor AWC19,341,347,	Red body, dense straw coloured spines becoming long with age.	8.5	£3
napina v. spinosior AWC502	Body more red, spines more prominent, otherwise quite similar.	6.5	£2

nigrihorrida AWC25, 330	From various locations, glassy black to straw coloured spines.	8.5	£3
occulta	Bronze/red bodied plants, almost spineless with chin shaped tubercles!	6.5	£3
paucicostata (viridis form)	Glaucus blue stems with short black spines - attractive!	6.5	£3
subgibbosa AWC12, 363	Plants from several different locations, mostly yellow spines.	8.5	£3
villosa AWC233, 632	Dense long, glassy, gold/black spines on red body.	6.5	£2
Sp. AWC 414	Strong curved golden spines on red/green body. Pyrrhocactus type.	6.5	£3
Sp. AWC 419	Tap rooted, cylindrical stem, woolly brown spines and flower buds.	6.5	£3
Sp. AWC 421	Similar to Riecheanus. Tuberos roots, woolly flower buds, yellow/brown spines	6.5	£3
Sp. AWC 598	Similar to Riecheanus, olive green body, tiny spines.	6.5	£3
Sp. AWC 503	Similar to napina spinosior but from a different location.	6.5	£3
Sp. AWC561 (<i>nidus type?</i>)	Glassy white and black spines on small globular plants.	6.5	£3
Sp. AWC791	Similar to N. napina but more miniature growing.	6.5	£3
<u>NOTOCACTUS</u>	Generally easy growing & flowering plants - good for beginners		
buiningii	Blue/green bodies, short straw coloured spines. Flowering size plants.	8.5	£3
erinacea (<i>Wigginsia</i>)	Many acute ribs, red/brown spines, yellow flowers from hairy brown buds.	8.5	£3
leninghausii	Popular yellow spined plant, flowers when about 15cm high.	8.5	£3
magnificus	Blue body, yellow spines, yellow flowers. Forms clusters with maturity.	6.5	£2
turececkianus	Big yellow flowers, glossy green body. Flat, downward pointed spines.	8.5	£3
uebelmanianus	Rounded ribs, can have purple/red or yellow flowers.	8.5	£3
<u>OBREGONIA</u>	Comes from a warm part of Tamaulipas and needs a little shade		
denegrii	Olive green tubercles in rosette form, artichoke like appearance!	6.5	£3
<u>PELECYPHORA</u>	10 year old plants on their own roots, very slow growing		
asseliformis	Hatchet shaped tubercles tipped with tiny grey spines, big tap roots!	6.5	£10
strobiliformis	Looks like a green pinecone! Pink flowers, was formerly Encephalocarpus.	6.5	£10
<u>REBUTIA</u> including Aylostera.	Small clustering plants, very free flowering & easy cultivation		
albopectinata	Short, pectinate white spines, similar to some Sulcorebutia forms.	6.5	£2
heliosa	Sought after, densely pectinate spined plants, orange flowers.	6.5	£2
heliosa v. condorensis	Similar in appearance to Lobivia famatimensis - attractive plants.	6.5	£2
heliosa RH259	Longer, untidy spines.	6.5	£2
pygmea	Dwarf clustering stems, tap rooted, short spines, pale pink flowers.	6.5	£2
rosealbiflora	R. pygmea type. Dark body, short pectinate spines. Interesting flowers.	6.5	Sold out!
"Louise" (<i>R. heliosa hybrid</i>)	Small headed, clustering plants, dense white spines and pink flowers.	6.5	Sold out!
<u>STROMBOCACTUS</u>	Disk shaped plants inhabiting clay walled canyons in central Mexico		
disciformis	Plants from 3cm diameter upward. Our oldest were sown in 1989! From £3 to £10	6.5	£3
jarmillae	This is supposed to be a miniature form. It is certainly slower growing.	6.5	£4
<u>SUBMATUCANA</u>	Mountain plants from South America		
haynii	Globular to cylindrical plants covered with dense glassy grey spines.	10.5	£5.50
madisoniorum	Looks like a pale green Lophophora! Red flowers, alpine horn shape.	6.5 : 8.5	£2 : £3
paucicostata	Clustering, spiny stems, also with red "Alpine Horn" flowers. Ex 10.5cm - £5.50	8.5	£3
<u>THELOCACTUS</u>	A wide ranging group from Texas to Queretaro in Central Mexico		
bicolor	Red and white flattened spines. Make huge pink flowers when 5-6cm..	6.5 : 8.5	£2 : £3
bicolor var. flavidispina	Fine straw coloured spines on clustering, smaller plants than the type.	6.5 : 8.5	£2 : £3
conothele	Olive green, prominently tubercled plants, long spines!	6.5	£2
hastifer	Columnar plant, looks a bit like Gymnocactus subterraneus! Queretaro, Mexico.	6.5 : 8.5	£2 : £3
hexaedrophorus	Flat grey bodies with big taproots. Satin white to pink flowers. Ex 10.5cm @ £5.50	8.5	£3
lausseri	Similar form to T. bicolor but spines brown & white. Flower pink/white.	8.5	£3
leucacanthus	One of the southerly forms. Fat bodied plants, pink flowers	8.5	£4
lophothele	Grey body, long spines. Can grow to more than 15cm in diameter. Ex12.5cm @ £9.50	8.5	£3
matudae	Olive green body, large tubercles, deep purple/pink flowers.	6.5 : 8.5	£2 : £3
McDowellii	Covered in dense glassy white spines. Pink flowers – larger ones ex 13.5cm @£12.50	8.5	£3

nidulans	Blue/grey body, long curved black/brown spines. Pink flowers. Ex 13.5cm @ £12.50	8.5	£3
rinconensis	Grey bodies, long spines, pink flowers- big plants ex 21cm bowls.	21	£15
uncinatus (Glandulicactus)	Grey bodied plants with long hooked white spines.	6.5	£2
<u>TRICHOCEUREUS</u>	Widespread group from South America, some grow to tree like proportions		
chilensis	Columnar forming with stiff straw coloured spines.	8.5	£3
grandis DJF454	Large growing, glossy green plants with yellow spines.	6.5	£2
terscheckii Z1121	Very broad plants, becoming columnar. Strong golden spines.	8.5	£3
<u>TURBINICARPUS</u>	All of our Turbinicarpus are mature flowering size specimens		
alonsoi	Dark green, stout tubercles with upright spines. Purple red flowers.	6.5	£4
andersonii (panarottoi)	Flat, top shaped bodies, incurved spines, pink flowers in April.	6.5	£3
bonatzii	Tiny heads, incurved straw coloured spines - FEW!	6.5	Sold out!
dickisoniae	Tiny stems, white radials, black centrals, white flowers.	6.5	£3
flaviflorus	Thin neck to a large taproot. Corky golden spines, dull flower.	6.5	£2
jauernigii	Chalky grey plant body, looks like a black spined Lophophora!	6.5	£4
krainzianus	Long bristly spines, similar to T. psedomacrole.	6.5	£3
krainzianus v. minimus	Weird! Long thin stems on large taproot. Small yellow flowers.	6.5	£3
lauii	Thin wispy spines, larger flowers than most Turbinicarpus.	6.5	Sold out!
lophophoroides	Biggest growing Turb. also the easiest to kill! Large pink flowers.	6.5	£3
macrochele	Small plants, curly dark spines, almost flat tubercles & big taproot.	6.5	£3
polaskii	Nice fat plants with corky spines, up to 3cm. diameter.	6.5	£4
pseudomacrole	Flowers pink to white! Mature plants with large tap roots.	6.5	£3
pseudopectinatus	Often mistaken for a Pelecypora – Grafted!	6.5	£4
valdezianus (Normanbokea)	Flowers can be pink or white, spines are quite plumose.	6.5	£3
<u>UEBELMANIA</u>	Slightly tender Brazilian plants - distinctive spination & colouring		
buiningii (<i>grafted</i>)	Mahogany coloured plant body, short stiff spines, short Harrisia stocks.	8.5	£6.50
pectinifera (<i>grafted</i>)	Beautiful purple body, black spines. Tiny yellow flowers. Much sought after.	8.5	£9.50
<u>OTHER SUCCULENTS</u>	As usual we have tried to list a good range of smaller caudiciform plants		
<u>ADENIA</u>	Passionflower family, tender!		
glauca	Produces a large, marbled, blue-green caudex. Glaucus blue leaves.	8.5	£4
keremanthus	Green, hairy, branching caudex, pale leaves, white flowers.	8.5	£4
spinosa	Marbled green stems, blue green leaves, large growing.	8.5	£4
<u>ADENIUM</u>	Best grown as a houseplant as rather tender!		
boehemianum	Small plants, silvery branching caudex, pale, lanceolate leaves	6.5	£4
obesum (<i>globular type</i>)	"Desert rose" Silvery caudex, produces nice pink and white flowers.	12.5	Sold out!
<u>AGAVE</u>	From miniatures to giant plants, some are almost hardy in the UK		
marmorata	Grey leafed plant - they all look the same at this size!	8.5	£3
bracteosa	Grows to 80cm with rosette of soft pale green leaves, no teeth!	13.5	£9.50
medio picta (striata)	Has attractive central yellow stripe, much sought after plant.	10.5	Sold out!
oroensis	Another grey leafed sort - probably grows big!	10.5	£4.50
schidigera	Filiferous leaves, dark glossy green. Grows above the Durango snow line.	10.5	£4.50
schottii	A filiferous type with white fibres at the dark green leaf edges.	10.5	£4.50
stricta	Will eventually form a hemisphere of thin stiff leaves up to 1mtr diameter.	8.5	£3
toumeyana bella	Nicest form, white markings on dark green leaves, compact type.	6.5	£2
vilmoriniana	Soft green leaves without thorny edge! Fairly tender.	10.5	£4.50
Victoria Regina	Stiff dark green leaves with white markings, justifiably popular.	10.5	£5.50
<u>ALOE</u>	We are currently propagating many choice dwarf Aloe hybrids!		
bakeri	Narrow red leaves with white spots – miniature.	8.5	£3
"Black Frost"	Nice black leafed hybrid. Many white teeth at the edges. White winter flowers	6.5	£2
chortoliroides	Thin leafed, miniature grass aloe. Interesting, attractive and unusual.	6.5	£4
descoingsii	Dwarf Madagascar species with spotted triangular leaves.	6.5	£2

fragile	Nice dwarf plant, dark green & red leaves, flowers as a small plant.	8.5	Sold out!
greatheadii v. davyana	Larger growing. Dark glossy green leaves.	8.5	£3
haworthioides	Miniature sort, thin, dark green leaves covered with fine white "hairs".	6.5	£3
humilis	Small growing. Blue/grey leaves, white teeth. Easy to flower.	10.5	£4.50
"Lizard Lips" ISI 92-36	Sword shaped, pointed leaves with "zig-zag" white banding & "teeth".	6.5	£2
myriacantha	One of the "Grass Aloes". Attractive young plants.	6.5	£4
parvula	Pretty dwarf plant. Nice thin purple/grey leaves standing erect.	6.5	£3
"Pepe" ISI 95-19	A. haworthioides x A. descoingsii. Attractive dwarf plant.	6.5	£2
plicatillis	Pretty fan of smooth blue leaves, trunk forming. Flowers January. Ex 10.5cm @ £6	8.5	£4
rauhii v. tuberculata	Dark purple/red leaves with rough white markings on tops.	8.5	Sold out!
vera (<i>Barbadensis</i>)	Medicinal. Ugly boring green leaves. Someone must like it! Larger plants @ £4	8.5	£3
BRIGHAMIA	Hawaiian bottle tree		
insignis "Vulcan"	Fat green caudex with huge green leaves - good houseplant!	12.5	Sold out!
CALIBANUS	The leaves of this plant are used for thatching in Mexico!		
hookeri	Thin, sharp edged leaves from a corky caudex. From our own seed!	8.5	£3
CISSUS (inc. Cyphostemma)	Succulent grape vines usually with magnificent fat stems!		
juttae	Caudiciform vine Large heavy plants, contact us for shipping cost!	25	£55
sandersonii	Similar to C. juttae but different leaf form – young plants.	8.5	£5
jiguu	Thinner stemmed plant, climbing deciduous vine.	8.5	£4
DIDIERIA	Small group of spiny plants from Madagascar		
madagascariensis	Unusual, spiny, tall growing stems with long thin deciduous leaves.	8.5	Sold out!
DIOSCOREA	Yam family, D. elephantipes was the source of the drug cortisone		
batatas	Tubers best kept under ground while small. Strong large leafed vines.	8.5	£4
elephantipes	The famous elephants' foot! Makes huge tubers up to 1 metre diameter.	8.5	£5
hemicrypta	Keep the tubers buried to make them grow large! Different leaf form.	8.5	£4
japonica	Mostly subterranean tuber. Big heart shaped leaves on typical vine.	8.5	£4
rupicola	Small tubers with typical Dioscorea vine.	8.5	£4
sylvatica	Likes a higher temperature. Caudex often takes the shape of a foot!	8.5	£4
DUVALIA	Asclepidaceae – miniature sized plants with smelly flowers!		
corderoy	Olive green stems, unusual shaped flowers.	6.5	Sold out!
ENTANDOPHRAGMA	Caudiciform trees, usually with red bark		
caudatum	Pale green leaves & stems, may develop red colouring later.	8.5	£4
EUPHORBIA	Very large, varied group, some caudiciform		
abd-al-kuri (<i>grafted</i>)	Attractive purple/grey stems on columnar plant. Toxic sap! - Ready July	6.5	£8
alfredii	Thorn free stems with large hairy leaves, big flowers.	6.5	£8.50
ambovombensis	Small tuber topped with thin arms. Wavy edged green/red leaves.	6.5	£5.50
baiosensis ISI1202	Slim blue/grey stems with black thorns, clustering from the base.	10.5	£5.50
columnaris (<i>grafted</i>)	Rare! Has spine pairs curved like goat horns – seldom offered!	8.5	£8
cylindrifolia	Tuberous rooted, thin stems with cylindrical leaves.	6.5	£3
decaryi v. decaryi	Type species. Likes warmth & shade, wavy red/green leaves.	6.5	£3
francoisii	Tuberous root with short arms & multi-coloured leaves, choice.	6.5	£5.50
lactea cristate (<i>grafted</i>)	Produced in Thailand and with red marbling along the crest.	8.5	Sold out!
horrida v. major	Globular form, very attractive blue grey body, black thorns.	8.5	£3
moratii	Subterranean tuber. Pinkish flowers appear before the small leaves.	8.5	£10
mosaica	Tiny, clustering spineless stems. Uncommon.	6.5	Sold out!
obesa	Dark green dumplings! Male & female plants available. Ex 10.5cm @ £6.50	8.5	£3
officinatum	Short columnar plants, dark green, white spine pairs. From Morocco.	6.5	£2
opuntioides	Rounded, flattened Opuntia like stems from a caudiciform root.	8.5	Sold out!
phillipsioides	Attractive short, clustering, columnar stems with white spine pairs.	6.5	£3
piscidermis (<i>grafted</i>)	"Fish scale" plants! Unusual, mostly globular plants on E. canariensis.	8.5	£7.50

schoenlandii	Columnnar, club shaped plants with stout thorns. Young plants 10cm high.	6.5	£2
sepulta	Tiny clustering stems with grey continuous markings at rib edges	6.5	£3
suzannae	Tiny clustering heads with short green tubercles.	6.5	£2
suzannae cristate (<i>grafted</i>)	Pretty, clustering plants, light green coloured, some variegated.	8.5	£5
FOCKEA	Asclepidaceae, massive tuber forming plants		
edulis	Forms large caudex & lots of vine with age, milky sap is harmless	8.5	£4
GASTERIA	We have tried to select the smaller growing forms for our list		
"araiso-no-matsu"	Nice Japanese variegated cultivar. Miniature growing form.	6.5	Sold out!
armstrongii	Fat, dark green, tongue shaped leaves. Not large growing.	6.5	£3
baylissiana EVJ6-90	Small growing with dark green spotted leaves. Flowers at small size.	6.5	£2
brachyphylla variegata	Striped grey green/white leaves. Pretty!	6.5	£3
"little warty"	Attractive striped, spotted and warty leaves.	6.5	£2
glomerata EVJ 1054	A dwarf growing plant with pale green smooth leaves.	8.5	£3
schwickerdtiana	Glassy grey/green leaves. Small growing plants.	6.5	£2
Xgasterolea "Green Ice"	Intergeneric hybrid. Stout green/silver leaves with attractive markings.	6.5	£4
Xgasterolea "Wonder"	Another intergeneric hybrid. Flattened rosettes of silver leaves, nice!	6.5	£3
verrucosa	Thin, contorted dark green leaves covered with white pimples!	8.5	£3
HAWORTHIA	Mostly small rosette forming plants, some with attractive "windows"		
aranea	Small rosettes of narrow leaves, covered with cobweb like teeth.	8.5	£3
attenuata (<i>fish river form</i>)	Nicer form than the type, densely silver spotted leaves.	8.5	£3
attenuata variegata	Silver/white faint longitudinal striping - pale leaves. Unusual.	6.5	£2
bayeri (<i>was correct</i>)	Small compact rosettes, very dark green with smooth "windows".	6.5	Sold out!
chloracantha v. subglabrica	Short erect leaves, windowed on the upper surface.	6.5	£2
comptoniana	Fat, H. retusa type leaves with nice surface markings on the "windows".	6.5	£3
guttata	More robust than H. variegata. Light green leaves with white markings.	8.5	£3
koelmanniorum	Rough, brown leaves, like the heads of crocodiles! Scarce! Few!	6.5	Sold out!
limifolia v. umbomboensis	Plain smooth leaves go pinkish red in the sun.	8.5	£3
maughanii (<i>ex 7cm pots</i>)	Much sought after plant, leaves like truncated fingers with flat tops.	6.5	Sold out!
mirabilis v. calcarea	Blue green leaves, tapering to short point.	8.5	£3
parksiana	Miniature rosettes of short, dark green leaves. Slow growing.	6.5	£3
pumila	Fat, upturned leaves covered with white "papillae".	6.5	£3
pygmea var. asperula	Short triangular leaves, granulated "windows". Goes pink in good light.	6.5	£3
pygmea var. major	Longer, triangular leaves, striated and granulated.	6.5	£3
reticulata ISI 1090	Pale green leaves with indistinct white markings.	8.5	£3
retusa acuminata variegata	Probably a hybrid! - White striped leaves - pretty & easy to grow.	6.5	£2
springbokvlakense	Thumb shaped window leaves. Much sought after! From our own propagations.	6.5	Sold out!
truncata (<i>ex 8.5cm pots</i>)	Freely clustering form, nice markings. Good sized plants.	8.5	Sold out!
variegata (<i>Modesta form</i>)	Thin, marbled leaves. Freely clustering.	8.5	£3
HOODIA	Found to be an appetite suppressant, they are now farmed for this property		
juttae (<i>ex 10.5cm pots</i>)	Green/red stems with red/brown spines. Brown flowers.	10.5	Sold out!
gordonii (<i>ex 10.5cm pots</i>)	Very similar in appearance to the above species but flowers differ.	10.5	Sold out!
IBERVILLEA	Cucurbit vine from the USA and Mexico		
tenuisecta	Subterranean caudex, climbing vine. From New Mexico.	6.5	£3
IPOMEA	"Morning Glory" group, large flowers		
albivenia	Sweet potato like plant. Erect caudex, rambling stems, silver leaves.	8.5	£4
oblongata (<i>Turbinia</i>)	Small subterranean caudex, short vine with spatulate leaves.	8.5	£4
KEDROSTIS	Cucurbitaceae from Africa - winter dormant		
foetidissima IAS1672	Stems & flowers smell rank & foetid! Leaves with tiny hairs.	8.5	£4
hirtella IAS1332	Similar to above with trailing stems which smell when bruised.	8.5	£4
leloja	More columnnar caudex with trailing vines & green flowers.	8.5	£4

punicus	Similar to K. africans, with glaucous blue/green leaves.	8.5	£4
<u>MONADENIUM</u>	Euphorbia family, some with subterranean tubers		
coccineum	Thin pale green stems & leaves, red flower bracts look like praying mantis!	8.5	£3
ritchei	Fat slightly tuberculate stems, deciduous red/green leaves.	6.5	Sold out!
rhizophorum ISI 979	Subterranean stems with just a few leaves appearing above ground	6.5	£3
<u>PACHCORMUS</u>	Baja elephant tree. Small, caudiciform trees - good indoor bonsai		
discolor	Develops silver bark with age. Deciduous pinnate leaves. Good bonsai!	8.5	£7.50
<u>PACHYPODIUM</u>	Mostly Madagascan plants with interesting shaped stems		
bispinosum	Fat tuber with thin stems, spines in pairs, pretty flowers.	6.5	£5
lamerei	"Madagascar palm" can grow over 2 meters with big leaves.	8.5	£4
lealii v. saundersii	Fat green stems with glossy leaves. Nice young plants.	10.5	£4.50
namaquanum	Slow growing columnar plants, pubescent leaves, heavily armed!	6.5	£4
rutenbergianum	Tall thin plants not typical of the group at all!	8.5	£5
succulentum	Easiest to grow. Young plants about 2 years from flowering size.	6.5	£5
<u>RAPHIONACME</u>	Tuberous rooted Asclepidaceae		
Sp. (hirsuta?)	Large caudexes, with thin vines just starting. Ex 21cm bowls @ £20	12	£12
<u>SANSEVERIA</u>	Succulent leaves from tuberous roots		
aetheopica	Fat, dark green leaves with red margins when given good light. White flowers.	8.5	£3
<u>SECAMONE</u>	Small, tuber forming plants - no information at present!		
Sp. from Madagascar	Erect thin stems from a small tuber, new species to us.	6.5	£3
<u>SININGIA</u>	Tuberous rooted group of plants in the Begonia family		
leucotricha (<i>Reichstienaria</i>)	Soft, silver, "felty" leaves from a small tuber, tubular red flowers	8.5	Sold out!
<u>TALINUM</u>	Tuberous rooted group of plants easy to flower		
natalensis	Pale green leaves from a small tuber, tiny red flowers.	6.5	£3
paniculatum v. aureum	Similar to the above, yellow flowers.	6.5	£3
<u>TILLANDSIAS</u>	Propagated from our own collection, many seldom offered		
albida	Very white leaves. Flowers with yellow bracts. Can grow to 30cm		£2.50
andicola	Tiny grey, ladder-like stems. Very unusual		£1.50
diaguitensis	Thin, grey, hard stems, white scented flowers. Nice		£3
paleacea	Stiff hairy white leaves, ours are clustering		£3.50
recurvata	Dwarf, the most widespread in the wild		£1.00
schiedeana major	Grey green leaves at right angles to the stem. Clustering		£2
Sp. de Peru (paleacea form?)	Very soft scaled silvery leaves, deep pink flowers, nice		£2
tectorum	Makes large 20cm globes of feathery leaves. Young plants to grow on		£6.50
uesnioides	Spanish moss. Grows well out of doors from May/September		£2
xerographica	Stunning silver rosettes 15cm diameter. CITES 1 species - UK only!		£10
