

April 2008		Please see our "Terms" page for payment and postage options	
Species	Description	Pot Size	Price
AREQUIPA	Short columnar plants from Chile	cm	GBP
Sp. AWC 152	Densely coated in brown/grey spines, about 8cm tall.	6.5	£4
ARIOCARPUS	"Living Rock" plants - slow growing & much sought after	Pot Size	Price
agavoides (<i>Neogomesia</i>)	Narrow dark green tubercles. Flowering size plants now 10 years old.	6.5	£4
fissuratus	Thick dark green tubercles, develops woolly centre with age. 9 years old.	6.5	£4
bravoanus ssp. Hintonii	Fissured, dark green triangular tubercles becoming shorter with age. Just flowering size	6.5	£12.50
kotschoubeyanus	Rosette shaped plants, small triangular tubercles – 8 year old plants about 1.5 cm dia.	6.5	£4
kotschoubeyanus albiflorus	Rosette shaped plants, small triangular tubercles - flowering size, about 3cm.diameter.	6.5	£12.50
kots. Elephantidens	Rosette shaped plants, small triangular tubercles - flowering size, about 3cm.diameter.	6.5	£12.50
retusus SB68	Nice, longer tubercled form of A. retusus, 10 year old plants.	6.5	£4
retusus var. furfuraceus	Fat grey tubercles with roughened surface, 10 year old plants.	6.5	£4
trigonus	Olive green tubercles, sharply pointed at the tips, large yellow flowers, 9 years old.	6.5	£5
ASTROPHYTUM	Interesting plants, most are covered with white "spots"	Pot Size	Price
asterias	"Sand Dollars" –body flat to dome shaped. Yellow flowers, red centre. Flowering sized.	8.5 : 10.5	£6 : £10
asterias "Super Kobuto"	Covered with variable white markings. Yellow flowers, usually with a red centre.	6.5	£3
capricorne	Long twisted black spines, pale green spotted body. Flowering size.	6.5	£2
capricorne var. crassispinum	Almost bare body, much thicker, stronger spines. Very nice form.	6.5 : 8.5	£2 : £3
caput-medusae (<i>digitostigma</i>)	Looks nothing like an Astrophytum except for the flowers! Grafted – VERY FEW! -	6.5	£30
myriostigma	Flowering size, "Bishops Cap" Larger plants available from £17.50	6.5	£2
myriostigma v. coahuillense	Dense white coating. Flowering size plants, flowers yellow with a red centre.	6.5 : 8.5	£2 : £3
myriostigma v. nudans	Glossy green 5 ribbed plants, no white spots. Large plants available from £25	6.5 : 8.5	£2 : £3
myriostigma fa."onzuka"	4 or 5 ribs, densely white flecked plants with interesting markings. Grafted @ £5	6.5	£4
myriostigma v. quadricostata	Square plants for square pots! 4 ribbed plants, flowering size.	6.5 : 8.5	£2 : £3
"quadri-nudans"	Green 4 ribbed plants, no white spots. Unusual!	6.5	£3
ornatum	Nice white spotted form with strong brown/yellow spines Some large plants @ £35	6.5 : 8.5	£2 : £3
AZTEKIUM	Unusual shaped plants thought to be reminiscent of Aztec art	Pot Size	Price
hintoni	Largest growing Aztekium form, grafted, ex 6.5cm pots.	6.5	£6.50
ritteri	Flowering size plants just starting to cluster, on short Harrisia stocks.	6.5	£7.50
COPIAPOA	We expect to have many more species available from late summer 2008	Pot Size	Price
barquitensis	Red bodied plants when young, straight black spines	8.5	£4

bridgesii L829	Young plants have red bodies, straight straw coloured spines.	8.5	£4
haseltoniana	Young plants with golden bodies/spines, become chalky with age.	6.5 : 8.5	£3 : £4
lauii	Almost subterranean bodied, will make mats of tiny heads. Yellow flowers – nice!	6.5	£3
SP. AWC796 (coquimbana)	Fat red/green plants, mostly with curved black spines.	8.5	£4
<u>CORYPHANTHA</u>	Mammillaria family. Compact plants from Mexico & USA	Pot Size	Price
andreae	Dark glossy green body, large yellow flowers.	6.5	£2
bisbeeana (<i>Escobaria</i>)	Globular plants untidy pink coloured spines, Cochise Co. Arizona.	6.5	£3
cornifera	Clustering plant from the Big Bend area of Texas.	6.5	£3
garesii	Fat glossy green body, grey/white spines, yellow flowers. Grows large.	6.5	£2
mcdougallii (<i>Ortegocactus</i>)	Fat blue/green body, black spines, yellow flowers. Grafted.	6.5	£4
nelliae (<i>Escobaria</i>)	Pretty clustering miniature, red & straw coloured spines, pink flowers.	6.5	£2
sneidii (<i>Escobaria</i>)	Dwarf plants making clusters of many heads, dense white spines.	6.5	£2
varicolor (<i>Escobaria</i>)	Small globular plants, tight spination, pale pink flowers.	6.5	£2
vivipara (<i>Escobaria</i>)	Globular spiny plants, large pink flowers. Cold tolerant, the most hardy!	6.5	£2
<u>DISCOCACTUS</u>	Brazilian plants – unless grafted need ericaceous compost and high winter temps.	Pot Size	Price
albispinus (zehntneri)	Untidy long straw coloured spines, scented white flowers. Needs ericaceous compost	6.5	£4
ferricola (<i>grafted</i>)	One of the giants of the group, makes bodies up to 30cm diameter – large white flowers	8.5	£7.50
horstii (<i>grafted</i>)	2cm diameter purple/black bodies – tiny black spines, various grafting stocks.	6.5	£7.50
pugionacanthus (<i>grafted</i>)	Glossy green body with reddish spines – a few years from flowering	8.5	£6.50
<u>ECHINOCACTUS</u>	Generally large growing species, a few smaller choice ones	Pot Size	Price
grusonii	Popular “Golden Barrel” - or more unkindly “Mother in Law’s seat”! Various sizes.	10.5=>	From £4.50
grusonii v. alba	Spines are a glassy white. Most of our plants are clusters. Various sizes.	10.5=>	From £4.50
grusonii v. inermis	“brevispina” form, attractive short spines on the typical globular body.	12.5	£12.50
ingens	Giant barrel cacti in habitat, blue grey bodies with red bands.	6.5	£2
platyacanthus	Grey bodies, black spines. Areoles almost continuous on large plants.	6.5	£2
texensis	Flat grey green body, straw coloured spines, pink flowers. Tender!	12	£6.50
<u>ECHINOCEREUS</u>	Usually clustering, from miniatures to large clumps over 1 meter	Pot Size	Price
blanckii	Also known as procumbens, large 12cm dia pink & white flowers. Flowering sized plants	8.5	£3
chloranthus	Small growing plants, dense white spination, brown flowers.	6.5	£2
engelmannii JLH950812	A northern form with black & white spines, may be hardy.	6.5	£2
fasciculatus	Form of E. engelmannii from central Arizona, golden spines.	6.5	£2

fendleri var. eremeticus	Form with brown/white spines. Not a lot different to normal form!	6.5	£2
gentryi Lau 087	"Cucumber" - like stems, tiny spines, flowering size plants.	8.5 : 10.5	£3 : £4.50
knippelianus	Fat green body, big taproot, bristly spines. Pink flowers from the sides.	6.5	£2
knippelianus v. krugeri	Fat green body, soft bristly spines, flesh-coloured flowers from the plant centre.	6.5	£2
knippelianus v. reyesii	Fat green bodies, stiffer spines. Larger, deep pink flowers from the centre of the plant.	6.5	£2
morricallii	A spineless E. scheerii type. Flowers form low down on the sides of the pale green stems	8.5	£3
pectinatus v. rubra	Stunning red spines on our larger flowering sized plants. Easy flowering form	6.5 : 10.5	£2 : £5
perbellus	Nice black & white pectinate spines on short erect body. Pink flowers	6.5	2
pulchellus v. sharpie	White flowered, short bristly spines, more care with watering required.	6.5	£3
rosei (<i>Oro Grande form</i>)	Easy flowering plants from a population with many flower colours.	6.5 : 8.5	£2 : £3
subinermis	Glossy blue/green body with tiny spines & large yellow flowers	8.5 : 10.5	£3 : £4.50
stramineus J LH950764	From south of Samalayuca Mexico. Glassy white spines, robust stems.	8.5:10.5	£3 : £4.50
triglochidiatus J LH950825	Northern form, cluster forming plants. Quite hardy, spines typical of triglochidiatus.	8.5	£3
triglochidiatus inermis	Totally spineless form! Much kinder on the fingers when re-potting!	6.5 : 8.5	£2 : £3
viridiflorus	This form grows to about 10cm high. Nice dark brown spined plants.	6.5	£2
weinbergii	Short pectinate spines on a tap rooted body. Pink flowers from the sides of the plant.	8.5	£4
<u>EPITHELANTHA</u>	Mostly miniatures with pink flowers & red fruits	Pot Size	Price
bokei (<i>grafted</i>)	Big Bend area, Texas. Creamy white spines, small pink flowers.	6.5	£4
micromeris	From near Mud Mountain, New Mexico. Coarse white spines, pink flowers.	6.5	£3
<u>FEROCACTUS</u>	Small to large growing "Barrel Cacti" from Mexico & SW USA	Pot Size	Price
emoryi	Nice blue bodied plants, red & white spines, always popular with beginners.	6.5	£2
fordii DJF7	From Baja California. Flowers at a smaller size than most Ferocacti.	8.5	£3
glaucescens v. inermis	Unusual clustering plants, 0 to 1 yellow spine on pale green body.	12.5	£8.50
gracilis	Bold red spines, dark green, plant body. Smaller growing.	8.5	£3
herrerae	Large growing plant, strong re-curved brown spines, yellow flowers.	8.5 : 10.5	£3 : £4.50
hystrix	Pale grey/green body, strong, long, red & white spines. Can grow to 1 mtr. high!	10.5	£4.50
latispinus	Flat growing, broad red spines. Flowers pink/white, produced on 15cm plants	8.5 : 10.5	£3 : £4.50
macrodiscus	Flat growing plant with acute ribs. Flowering size plants ex 18cm pots @ £18	8.5 : 12.5	£3 : £6.50
rectispinus	Central spines up to 10cm long on typical Ferocactus body.	15	£10
robustus	From Tecomachalco Mexico. Makes small heads and clusters profusely.	8.5	£3
schwarzii	Dark green body with short yellow spines & acute ribs. Few left!	10.5	£4.50

townsendianus	Blue/green bodied plants with stout, short red spines.	6.5	£2
viridescens	Southern California & Baja. Produces green flowers while still small.	6.5 : 8.5	£2 : £3
<u>GEOHINTONIA</u>	Relatively recent discovery from Mexico. Monotypic genus	Pot Size	Price
mexicana	Blue/grey body, many acute ribs, tiny white spines, purple flowers. On own roots.	6.5	£7.50
<u>GYMNOCACTUS</u>	Closely allied to Turbinicarpus but generally more spiny	Pot Size	Price
beguinii	Small plants, dense black & white spines, large purple/pink flowers.	6.5	£3
horripilus	Clustering plants with black & white spines, pink flowers. Probably easiest to grow.	8.5	£3
viereckii spec Lau 1159	Lots of dark pink flowers on small spiny plants. Easiest to grow!	6.5	£2
ysabellae	Globular, golden spines, growing to 10cm. Pink/white flowers. Flowering sized plants.	6.5	£4
<u>GYMNOCALYCIUM</u>	South American group, mostly small flattened plants	Pot Size	Price
bodenbenderianum	Flattened reddish body with short spines	6.5	£2
bruchii v. brigittae P214	Tiny grey bodied plants with fine white spines. Disproportionate tap roots!	8.5	£3
castalanosii P80a	Pale green body, rounded ribs, long straight spines.	6.5	£2
hamatum	Strongly tuberculate , brown bodied plants with dark brown curved spines.	6.5	£2
megalothelos	Glossy green body with curly spines that remind you of Polynesian tattoos!	6.5	£3
mihanovichii	Purple/red bodies, white spines, pink flowers. A popular sort	6.5	£2
multiflorum	Fat, pale green bodies, straw coloured flowers. Large growing species.	10.5	£4.50
piltzorum P28	Flattened brown body with erect stiff spines.	6.5	£2
ragonesii	Dwarf brown bodies, tiny spines, flesh-coloured flowers, slow!	6.5 : 8.5	£2 : £3
saglione	Large rounded tubercles, long curved spines. Grows to football size!	6.5	£2
stellatum v. minutum	Small blue/green bodies with fine black spines.	6.5	£2
<u>HAMATOCACTUS</u>	Probably should be included with the Ferocactus group	Pot Size	Price
hamatacanthus	Long red & white spines on a globular plant. From the Big Bend area of Texas.	8.5	£3
setispinus	Small globular plants with pale yellow spines, yellow flowers. From Texas hill country.	6.5	£2
<u>LEUCHTENBERGIA</u>	Confuses many beginners with its un-cactus – like appearance	Pot Size	Price
principis	Pink/blue “fingers” with long papery spines. Huge yellow flowers.	6.5 : 8.5	£2 : £4
<u>LOBIVIA</u> (inc. Chamaecereus)	Medium to small growing cacti. Free flowering & easy cultivation.	Pot Size	Price
bruchii	Plants forming large "barrels" with bright yellow spines.	6.5	£2
dobeana	Clustering Echinopsis type, brick red flowers.	6.5	£2
famatimensis	Attractive small plants with tiny pectinate spines on a red/green body. Yellow flowers	6.5	£3
haematantha v. densispina	Small globular plants covered with dense grey spines. Yellow flowers.	6.5	£3
sylvestrii cristate	Stems start normal but then crest at the tips. Easy flowering form.	6.5 : 8.5	£2 : £3
sylvestrii (<i>yellow flower form</i>)	Unusually the flower can be half red half yellow. Sometimes both colours on one plant!	6.5	£2

sylvestrii hybrid #1	Possibly a Lobivia hybrid. Robust stems, red flower. Easy flowering!	6.5	£2
schieliana WR207	Dark green clustering plants with dense, straw coloured spines.	8.5 : 10.5	£3 : £4.50
subnudans (<i>Echinopsis</i>)	Fat green bodies with large woolly areoles, flowers at small size.	6.5 : 8.5	£2 : £3
<u>LOPHOCEREUS</u>	Columnar plants growing to 2 meters tall	Pot Size	Price
schottii monstrose	"Totem Pole" Totally spineless and non-existent ribs! Approx. 45cm tall. FEW!	15	£30
<u>LOPHOPHORA</u>	The Czech. Society has published an interesting booklet on this group	Pot Size	Price
echinata diffusa	Green body, white to cream coloured flowers. Queretaro form	6.5 : 10.5	£3 : £25
fricci	Larger flowers, sometimes red. May be the same as L. w. decipiens - small plants	10.5	£25
koehresii	Dark, more tuberculate body, thin neck, different flower & fruit	6.5	£6
williamsii	The common peyote. Some of our plants are just starting to flower.	6.5 : 8.5	£4 : £7.50
williamsii decipiens	Larger, more rounded blue bodies, large pink flowers	6.5	£3
<u>MAMMILLARIA</u>	Miniature plants to large clustering sorts, generally free flowering	Pot Size	Price
aurielanata v. alba	Choice small plant, covered with dense white "hairs". Pink flowers, tap rooted, scarce!	6.5	£4
beneckeii	Clusters of small stems which detach easily – not good to pack!	6.5	£2
boolii	Pale, blue/green bodied plants, black/white spines, pink flowers. From Baja California	6.5	£2
camptotricha "mme. marnier"	Very attractive form with short, yellow, strongly curved spines.	6.5	£2
celsiana	White radial spines, yellow centrals. Plant globular while young.	6.5	£2
dixanthocentron	Long yellow central spines, red flowers. Nice tidy plants.	12.5	£6.50
egreggia	Small globular plants, plumose white spines. "Golf Ball" cactus! - Grafted	6.5	£4
duwei	Globular white spined plants with occasional pubescent central spines. Yellow flowers	8.5	£3
elongata cristate	Intertwining, caterpillar like stems covered with tight yellow spines.	8.5	£4
formosa	Flat, disk like plants with lots of wool in the axils & pink flowers.	6.5	£2
goodridgii	Small growing plants, brown hooked spines on yellow/green body.	6.5	£2
graesneriana	Slightly columnar plants covered with short yellow spines	10.5	£5
hahniana	Similar to celsiana but with more/less hairs from the axils. Good beginners plant.	6.5	£2
herrerae	Tiny white spined plants. Tap rooted form from Mexico. – Rare - Few!	6.5	£5.50
hidalgensis var. inermis	Unusual, pale green spineless plant, dark red flowers! – FEW!	6.5	£3
lalui	Short, white spined form, many deep pink flowers. Will form clusters quickly.	6.5	£2
lewisiana	Long, thin spines making a "birds nest" on top of the plant! From Baja.	6.5	£2
longimamma (<i>Dolichothele</i>)	Fat green tubercles with thin spines at the tips. Huge yellow flowers.	6.5	£2
magnifica cristate	Contorted stems covered with fine white spines, occasional hooked centrals.	12	£7.50

marksiana	Nice globular plants with bright yellow spines & flowers.	6.5 : 8.5	£2 : £3
matudae	Taller growing plant, olive green body with pectinate brown spines.	6.5 : 8.5	£2 : £3
matudae cristate	Fat contorted stems, attractive spines, ex 12cm bowls.	12	£7.50
microthele	Extremely flattened plants with tiny hard spines. Almost subterranean in habitat.	8.5	£3
mystax	Long intertwined spines on mature plants. Rd. to Huajuapán de León, Tehuacán Mexico.	10.5	£4.50
napina	Big dark red flowers. Short, glassy spines, large taproot. Flowering April/May	6.5	£4
nejapensis	Globular, clustering with age. Long white spines, yellow flowers.	6.5 : 8.5	£2 : £3
parkinsonii	Eventually clustering, stems covered with stiff white spines.	6.5	£2
pectinifera (<i>S. pectinata</i>)	Beautiful white spined plants on own roots. Another "golf ball"!	6.5	£3 : £4
perez de la rosa	Pretty, pink flowered plants. White radial spines, hooked black centrals.	6.5	£3
plumose	Clusters of stems covered in dense soft white spines, white flowers.	6.5	£2
scheideana	Tap rooted. Golden yellow spines, dark green body, yellow flowers.	6.5 : 8.5	£2 : £3
schumanii (<i>Bartschella</i>)	Bluish bodies, hooked black spines, large pink flowers.	6.5	£2
sempervivi	Densely tuberculate body, black spines, lots of wool in the axils	8.5	£3
senilis (<i>Mammilopsis</i>)	Fine covering of hooked white spines. Large red flowers. Cold hardy.	16	£12.50
tetrancistra - grafted	One of the most difficult to grow! Black hooked spines on blue/green body. Big flowers!	6.5	£4
theresae – grafted	Pretty red bodied plants with big (for the size of the plant) pink flowers - grafted	6.5	£4
tepexcicensis	Small globular plants with a covering of brown spines. Pink flowers.	6.5	£2
"Uno Pico"	From a <i>M. magnifica</i> sport, solitary central spines, red flowers.	6.5	£2
<u>MELOCACTUS</u>	Cephalium forming plants from Cuba & Central America	Pot Size	Price
matanzanus	Dwarf Cuban Melocactus. Flowering sized plants, orange cephalium.	12.5	£7.50
<u>NEOPORTERIA</u>	Incl. Thelocephala, Neochilenia, Pyrrhocactus. AWC = Alan Craig col. nos.	Pot Size	Price
chilensis AWC555	From 2 locations, red/green bodied plants, short, stiff yellow spines.	8.5	£3
coimasensis AWC24, 553	Various locations, Green bodied plants dense bristly straw/black spines.	8.5	£3
esmeraldana FK775	Large tap roots, almost black body, small orange/brown spines.	6.5	£2
krausii	Pretty, purple bodied plants with white, pectinate spines.	6.5	£3
multicolor AWC19,341,347,	Red body, dense straw coloured spines becoming long with age.	8.5	£3
napina v. spinosior AWC502	Body more red, spines more prominent, otherwise quite similar.	6.5	£2
nigrihorrida AWC25, 330	From various locations, glassy black to straw coloured spines.	8.5	£3
occulta	Bronze/red bodied plants, almost spineless with chin shaped tubercles!	6.5	£3
paucicostata (viridis form)	Glaucus blue stems with short black spines - attractive!	6.5	£3

subgibbosa AWC12, 363	Plants from several different locations, mostly yellow spines.	8.5	£3
Sp. AWC 414	Strong curved golden spines on red/green body. Pyrrhocactus type.	6.5	£3
Sp. AWC 503	Similar to napina spinosior but from a different location.	6.5	£3
Sp. AWC561 (<i>nidus</i> type?)	Glassy white and black spines on small globular plants.	6.5	£3
Sp. AWC791	Similar to N. napina but more miniature growing.	6.5	£3
<u>NOTOCACTUS</u>	Generally easy growing & flowering plants - good for beginners	Pot Size	Price
Buiningii	Blue/green bodies, short pale straw coloured spines.	6.5	£2
claviceps	Similar to leninghausii but spination stiffer and not as dense	10.5	£4.50
erinacea (<i>Wigginsia</i>)	Many acute ribs, red/brown spines, yellow flowers from hairy brown buds.	8.5	£3
leninghausii	Popular yellow spined plant, flowers when about 15cm high.	6.5	£2
magnificus	Blue body, yellow spines, yellow flowers. Forms clusters with maturity.	6.5	£2
<u>OBREGONIA</u>	Generally easy growing & flowering plants - good for beginners	Pot Size	Price
denegrii (<i>grafted</i>)	Artichoke like green bodies, short straw coloured spines. Needs a little shade.	6.5	£5
<u>PELECYPHORA</u>	10 year old plants on their own roots, very slow growing	Pot Size	Price
asseliformis	Hatchet shaped tubercles tipped with tiny grey spines, big tap roots for their size!	6.5	£7.50 : £10
strobiliformis	Looks like a green pinecone! Pink flowers, was formerly Encephalocarpus.	6.5	£10 : £15
<u>REBUTIA</u> including <i>Aylostera</i> .	Small clustering plants, free flowering & easy cultivation. More plants unlisted –ask!	Pot Size	Price
albopectinata	Short, pectinate white spines, similar to some Sulcorebutia forms.	6.5	£2
densipectinata KK 849	Clustering small bodies with tiny white pectinate spines. Flowering size	6.5	£2
fabrisii v. aurieflora	Tiny clustering heads, fine white spines, yellow flowers	6.5	£2
flavistyla	Larger clustering bodies, untidy short white spines, orange red flowers	8.5	£2
heliosa	Sought after, densely pectinate spined plants, orange flowers.	6.5	£2
heliosa v. condorensis	Similar in appearance to Lobivia famatimensis - attractive plants.	6.5	£2
heliosa RH259	Pale green body, longer, untidy silvery spines.	6.5	£2
pulvinosa	Similar to fabrisii but spines shorter and stiffer, heads larger.	6.5	£2
“Twickers Pink”	Pretty hybrid, pale pink flowers. Typical globular Rebutia body.	6.5	£2
<u>STROMBOCACTUS</u>	Disk shaped plants inhabiting clay walled canyons in central Mexico	Pot Size	Price
disciformis	Plants from 3cm diameter upward. Our oldest were sown in 1989!	6.5 : 8.5	£3 to £10
jarmillae	This is supposed to be a miniature form. It is certainly slower growing.	6.5	£4
<u>SUBMATUCANA</u>	Mountain plants from South America	Pot Size	Price
madisoniorum	Looks like a pale green Lophophora! Red flowers, alpine horn shape.	6.5 : 8.5	£2 : £3
paucicostata	Clustering, spiny stems, also with red “Alpine Horn” flowers.	6.5	£2

polzii	Strange form, makes multiple tiny offsets around the main head. Short spines.	6.5	£2
<u>THELOCACTUS</u>	A wide ranging group from Texas to Queretaro in Central Mexico	Pot Size	Price
bicolour	Red and white flattened spines. Make huge pink flowers when 5-6cm.	6.5 : 8.5	£2 : £3
bicolor var. flavidispina	Fine straw coloured spines on clustering, smaller plants than the type.	6.5 : 8.5	£2 : £3
conothele	Olive green, prominently tubercled plants, long spines!	8.5	£3
hastifer	Columnar plant, looks a bit like Gymnocactus subterraneus! Queretaro, Mexico.	6.5 : 8.5	£2 : £3
hexaedrophorus	Nice flat grey bodies with big taproots. Satin white to pink flowers.	8.5 : 10.5	£3 : £5.50
lausseri	Similar form to T. bicolor but spines brown & white. Flower pink/white.	6.5 : 8.5	£2 : £3
leucacanthus	One of the southerly forms. Fat bodied plants, pink flowers – FEW!	10.5	£5
lophothele	Grey body, long spines. Can grow to more than 15cm in diameter.	6.5	£2
matudae	Olive green body, large tubercles, deep purple/pink flowers.	6.5 : 8.5	£2 : £3
mcDowellii	Covered in dense glassy white spines. Pink flowers – beautiful plants.	6.5 : 13.5	£2 : £12.50
nidulans	Blue/grey body, long curved black/brown spines. Pink flowers.	8.5 : 13.5	£3 : £12.50
rinconensis	Grey bodies, long spines, pink flowers- big plants ex 21cm bowls.	21	£15
uncinatus (Glandulicactus)	Grey bodied plants with long hooked white spines. Unusual blood red flowers	8.5	£4
<u>TRICHOCEREUS</u>	Widespread group from South America, some grow to tree like proportions	Pot Size	Price
grandis DJF454	Large growing, glossy green plants with yellow spines.	6.5	£2
<u>TURBINICARPUS</u>	All of our Turbinicarpus are mature flowering size specimens	Pot Size	Price
alonsoi	Dark green, stout tubercles with upright spines. Purple red flowers.	6.5	£4
andersonii (panarottoi)	Flat, top shaped bodies, incurved spines, pink flowers in April.	6.5	£5
dickisoniae	Tiny stems, white radials, black centrals, white flowers.	6.5	£3
flaviflorus	Thin neck to a large taproot. Corky golden spines, dull flower.	6.5	£2
jauernigii	Chalky grey plant body, looks like a black spined Lophophora!	6.5	£4
krainzianus	Long bristly spines, similar to T. psedomacroechele.	6.5	£4
krainzianus v. minimus	Weird! Long thin stems on large taproot. Small yellow flowers.	6.5	£3
lophophoroides	Biggest growing Turb. also the easiest to kill! Large pink flowers.	6.5	£3
macrochele	Small plants, curly dark spines, almost flat tubercles & big taproot.	6.5	£3
polaskii	Nice fat plants with corky spines, up to 3cm. diameter.	6.5	£4
pseudomacroechele	Flowers pink to white! Mature plants with large tap roots.	6.5	£3
pseudopectinatus	Often mistaken for a Pelecyphora - was Normanbokea – Grafted!	6.5	£5
pseudopectinatus cristate	Tight pectinate spines on a dark green body – Grafted!	6.5	£4

<i>schmiedickeanus</i>	Small plant seldom offered these days. Nice pink flowers and corky, twisted spines	6.5	£6
<i>swobodae</i>	Small dark redish/grey body, elongate tubercles, black incurved spines	6.5	£4
<i>valdezianus</i> (<i>Normanbokea</i>)	Flowers can be pink or white, spines are quite plumose.	6.5	£3
<u>UEBELMANIA</u>	Slightly tender Brazilian plants - distinctive spination & colouring	Pot Size	Price
<i>buiningii</i> (<i>grafted</i>)	Mahogany coloured plant body, short stiff spines, short <i>Harrisia</i> stocks.	8.5	£7.50
<i>pectinifera</i> (<i>grafted</i>)	Beautiful purple body, black spines. Tiny yellow flowers. Much sought after.	8.5	£10
<u>OTHER SUCCULENTS</u>	As usual we have tried to list a good range of smaller caudiciform plants		
<u>ADENIA</u>	Passionflower family, tender!	Pot Size	Price
<i>globosa</i>	Rooted cutings, these will make a fat green caudex in time	8.5	£5
<i>venenata</i>	Rooted cuttings. Thinner stems and easier to flower than most forms	8.5	£5
<u>ADENIUM</u>	Best grown as a houseplant as rather tender!		
<i>bohemianum</i>	Small plants 10 -15cm tall, silvery branching caudex, pale, rounded leaves	6.5	£4
<i>multiflorum</i>	Obesum type, nice seed grown plants about 10cm high, not far off flowering size	6.5	£4
<i>obesum</i>	"Desert rose" – huge silvery caudex, nice pink and white flowers. Check for postage!	25	£35
<u>AGAVE</u>	From miniatures to giant plants, some are almost hardy in the UK	Pot Size	Price
<i>atrovirens</i> v. <i>mirabilis</i>	Small rosettes at present – seed grown – probably grows large!	6.5	£2
<i>leopoldii</i>	Magnificent rosettes of narrow leaves with curling fibres at the edges – attractive!	18	£25
<i>macroacantha</i>	Will make an upright rosette of narrow blue green leaves with black terminal spine	8.5	£3
<i>marmorata</i>	Grey leaved plant with leaf edge teeth turned back towards the centre of the plant.	10.5	£4.50
<i>oroensis</i>	Glossy grey/green leaves - probably grows big!	10.5	£4.50
<i>parrasana</i>	From Parras, Mexico. Grey leaves with attractive teeth and imprinting on the leaves.	10.5	£4.50
<i>schidigera</i>	Filiferous leaves, dark glossy green. Grows above the Durango snow line.	10.5	£4.50
<i>schottii</i>	A filiferous type with white fibres at the dark green leaf edges.	10.5	£4.50
<i>sp. Bustamente Tamaulipas</i>	Small grey green leaves. As yet we have no more information on this one.	6.5	£2
<i>sp. From Camargo, Chihuahua</i>	Attractive dark green leaves with a paler mid stripe & white teeth on the edges	6.5	£3
<i>stricta</i>	Will eventually form a hemisphere of thin stiff leaves up to 1mtr diameter.	6.5 : 8.5	£2 : £3
<i>toumeyana bella</i>	Nicest form, white markings on dark green leaves, compact type.	8.5	£4
<i>vershafeldtii compacta</i>	Nice blue green rosettes of deeply indented leaves – black teeth at edges	18	£15
<i>vilmoriniana</i>	Soft green leaves without thorny edge! Fairly tender.	10.5	£4.50
<i>victoria regina</i>	Stiff dark green leaves with white markings, justifiably popular.	11.5	£5.50
<u>ALOE</u>	We are currently propagating many choice dwarf Aloe hybrids! Ask if interested	Pot Size	Price
"Bedfords Beau" (<i>Phil Bedford</i>)	Pretty somaliense hybrid with purple leaves and white markings makes heads 12cm dia.	6.5	£4

boyleyi	Light green leaves that fold back down the sides of the pot – a “grass aloe”	8.5	£3
camperi	Upright dark green leaves edged with red “teeth”	8.5	£3
cooperi	Tall growing stemless grass aloe, narrow spotted leaves that can grow to 1mtr in length	8.5	£4
descoingsii	Pretty, dwarf Madagascar species with spotted triangular leaves.	6.5	£2
dyeri	Striated dark green leaves with longitudinal broken white stripes	8.5	£3
ecklonis	Soft, pale green leaves with tiny white “teeth” & random white spots	8.5	£3
greatheadii v. davyana	Large growing form, dark glossy green leaves.	8.5	£3
humilis	Small growing. Blue/grey leaves, white teeth. Easy to flower.	10.5	£4.50
“Lizard Lips” ISI 92-36	Sword shaped, pointed leaves with "zig-zag" white banding & “teeth”.	6.5	£2
“Pepe” ISI 95-19	A. haworthioides x A. descoingsii. Attractive dwarf plant.	6.5	£2
plicatillis	Pretty fan of smooth blue leaves, trunk forming. Flowers January.	8.5 : 10.5	£4 : £6
polyphylla	The famous spiral aloe of Lesotho. Likes to be cool and damp. Hardy in the UK!	6.5	£3.50
rauhii v	Dark purple/red leaves with rough white markings on tops.	10.5	£4.50
vera (<i>Barbadensis</i>)	Medicinal. Ugly boring green leaves. Someone must like it!	8.5 : 10.5	£3 : £4
<u>CALIBANUS</u>	The leaves of this plant are used for thatching in Mexico!	Pot Size	Price
hookeri	Thin, sharp edged leaves from a corky caudex. From our own seed!	8.5	£3
<u>CERRARIA</u>	The leaves of this plant are used for thatching in Mexico!	Pot Size	Price
pygmea (<i>grafted</i>)	Little fat leaved shrubs. Can be trained to make indoor bonsai	8.5	£4
<u>COCCINEA</u>	Caudiciform plants with deciduous climbing vine	Pot Size	Price
hirtella	Pale green ivy shaped leaves. Vines make tendrils to climb among the other plants!	8.5	£4
quinqueloba	As the name suggests, the leaves have 5 lobes! Vines like the previous plant.	8.5	£4
<u>DIDIERIA</u>	Small group of spiny plants from Madagascar	Pot Size	Price
“petignattii”	New variety! Unusual, spiny, flat growing stems with long thin deciduous leaves.	8.5	£17.50
<u>DIOSCOREA</u>	Yam family, D. elephantipes was the source of the drug cortisone	Pot Size	Price
cotenifolia	A new one to us! Looks very similar to sylvatica	6.5	£4
elephantipes	The famous elephants’ foot! Makes huge tubers up to 1 metre diameter.	8.5	£5
hemicypta	Keep the tubers buried to make them grow large! Different leaf form.	6.5	£4
sylvatica	Likes a higher temperature. Caudex often takes the shape of a foot!	8.5	£4
<u>ENTANDOPHRAGMA</u>	Caudiciform trees, usually with red bark	Pot Size	Price
caudatum	Pale green leaves & stems, may develop red colouring later.	8.5	£4
<u>EUPHORBIA</u>	Very large, varied group, some caudiciform	Pot Size	Price
abd-al-kuri (<i>grafted</i>)	Impressive blue/grey stems with warty, lizard like skin. Sap highly toxic!	6.5	£8
ambovombensis	Small tuber topped with thin arms. Wavy edged green/red leaves.	6.5	£8.50

baiosensis ISI1202	Slim blue/grey stems with black thorns, clustering from the base.	8.5	£4
balsamifera	Attractive little shrubs with a rosette of leaves at the tips of the stems , bonsai like.	6.5	£3
cylindrifolia	Tuberous rooted, thin stems with cylindrical leaves.	6.5	£3
decaryi v. decaryi	Type species. Likes warmth & shade, wavy red/green leaves.	6.5	£3
decidua	Tuberous root with deciduous arms – RARE- not often offered!	8.5	£27.50
francoisii	Tuberous root with short arms & multi-coloured leaves, choice.	6.5	£8.50
gottleibei	Crown of thorns type plant with thin grassy leaves and multitude of red flowers	6.5	£5.50
gymnocalycioides	As the name suggests it looks like a Gymnocalycium. Young plants, some grafts @ £8	6.5	£9.50
moratii	Subterranean tuber. Pinkish flowers appear before the small leaves.	8.5	£10
mosaica	Tiny, clustering spineless stems. Uncommon.	6.5	Avail. July
obesa	Red brown to dark green dumplings, largest about the size of a large apple!	6.5 : 10.5	£2 : £5.50
obesa cristate (grafted)	Crested form on short E. canariensis stocks. Unusual	6.5	£5
officinatum	Short columnar plants, dark green, white spine pairs. From Morocco.	8.5	£3
phillipsioides	Attractive short, clustering, columnar stems with white spine pairs.	6.5	£3
piscidermis (grafted)	“Fish scale” plants! Unusual, mostly globular plants on E. canariensis.	8.5	£8
piscidermis cristate (grafted)	Crested form of the “Fish scale” plants. On E. canariensis stocks.	8.5	£8
Schoenlandii	Columnar, club shaped plants with stout thorns. Young plants 10cm high.	6.5	£2
sepulta	Tiny clustering stems with grey continuous markings at rib edges	6.5	Avail. July
suzannae	Tiny clustering heads with short green tubercles.	6.5	£2
suzannae cristate (grafted)	Pretty, clustering plants, light green coloured, some variegated.	8.5	£5
squarrosa	Tuberous rooted with long flattened stems from the crown	12.5	£9.50
warringiae	Globular tubers, short stems & thin flattened leaves with wavy edges	8.5	£15.50
<u>FOCKEA</u>	Asclepidaceae, massive tuber forming plants	Pot Size	Price
edulis	Forms large caudex & lots of vine with age, milky sap is harmless	8.5	£4
natalensis (Petopentia)	Glossy dark green leaves, purple underneath, corky brown caudex	8.5	£4
<u>GASTERIA</u>	We have tried to select the smaller growing forms for our list	Pot Size	Price
angustifolia	Slim glossy green leaves with white spots	6.5	£3
armstrongii	Fat, dark green, tongue shaped leaves. Not large growing.	6.5	£3
brachyphylla variegata	Striped grey green/white leaves. Pretty!	6.5	£3
excelsa	Leaves 2.5-3cm wide, dark green with white spots almost in lines	6.5	£2
glomerata EVJ 1054	A dwarf growing plant with pale green smooth leaves.	8.5	£2
"little warty"	Attractive striped, spotted and warty leaves.	6.5	£2
minima	Short stubby leaves, glossy dark green with white spots	6.5	£2
schwickerdtiana	Glassy grey/green leaves. Small growing plants.	6.5	£2

verrucosa	Thin, contorted dark green leaves covered with white pimples!	8.5	£2
xgasterolea "Green Ice"	Intergeneric hybrid. Stout green/silver leaves with attractive markings.	6.5	£4
xgasterolea "Wonder"	Another intergeneric hybrid. Flattened rosettes of silver leaves, nice!	6.5	£3
<u>HAWORTHIA</u>	Mostly small rosette forming plants, some with attractive "windows"	Pot Size	Price
aranaea	Small rosettes of narrow leaves, covered with cobweb like teeth.	8.5	£3
attenuata v. uitewaaliana	Nicer form than the type, fine, silver spotting densely covering the leaves.	8.5	£3
chloracantha v. subglabrica	Short erect leaves, windowed on the upper surface.	6.5	£2
dekenahii	Retusa form with softly rounded "windows" to the tops of the leaves – nice!	6.5	£4
glabrata	Boring green leaves forming large mounds	6.5	£2
guttata	More robust than H. variegata. Light green leaves with white markings.	8.5	£3
limifolia v. umbomboensis	Plain smooth leaves which go pinkish red in the sun.	8.5	£3
maughanii	Much sought after plant, leaves like truncated fingers with flat tops.	8.5	£9.50
mirabilis v. calcarea	Blue green leaves, tapering to short point.	8.5	£3
parksiana	Miniature rosettes of short, dark green leaves. Slow growing.	6.5	£3
pumila	Fat, upturned leaves covered with white "papillae".	6.5	£3
pygmaea var. asperula	Short triangular leaves, granulated "windows". Goes pink in good light.	6.5	£3
pygmaea var. major	Longer, triangular leaves, striated and granulated.	6.5	£3
reticulata ISI 1090	Pale green leaves with indistinct white markings.	8.5	£3
retusa	Various "window" top markings – some quite unusual!	6.5	£3
retusa acuminata	Probably a hybrid! - White striped leaves - pretty & easy to grow.	6.5	£2
springbokvlakense	Thumb shaped window leaves. Much sought after! From our own propagations.	6.5 : 8.5	£5 : £9.50
truncata	Freely clustering form, nice markings. Good sized plants.	6.5 : 8.5	£3 : £9.50
variegata (<i>Modesta form</i>)	Thin, marbled leaves. Freely clustering.	8.5	£3
woolei	Dark green, upright leaves with light "windows" to the inside faces	6.5	£3
<u>IBERVILLEA</u>	Cucurbit vine from the USA and Mexico	Pot Size	Price
tennissecta	Subterranean caudex, climbing vine. From New Mexico.	6.5	£3
<u>KEDROSTIS</u>	Cucurbitaceae from Africa – winter dormant	Pot Size	Price
foetidissima IAS1672	Stems & flowers smell rank & foetid! Leaves with tiny hairs.	8.5	£4
hirtella IAS1332	Similar to above with trailing stems which smell when bruised.	8.5	£4
leloja	More columnar caudex with trailing vines & green flowers.	8.5	£4
<u>MONADENIUM</u>	Euphorbia family, some with subterranean tubers	Pot Size	Price
rhizophorum ISI 979	Subterranean stems with just a few leaves appearing above ground	6.5	£3
<u>PACHYPODIUM</u>	Mostly Madagascan plants with interesting shaped stems	Pot Size	Price
bispinosum	Fat tuber with thin stems, spines in pairs, pretty flowers. Some huge plants @ £32.50	6.5	£5

<i>brevicaule (grafted)</i>	Stubby stems with many heads, green leaves & yellow flowers. On <i>P. lamerei</i> stocks	8.5	£12.50
<i>cactipes (grafted)</i>	Felty brown stems with red/green leaves similar to <i>rosulatum</i> . On <i>P. lamerei</i> stocks	10.5	£12.50
<i>lealii v. saundersii</i>	Fat green stems with glossy leaves. Nice young plants.	8.5 :10.5	£4.50 : £6.50
<i>namaquanum</i>	Slow growing columnar plants, pubescent leaves, heavily armed!	6.5 : 10.5	£4 : £7.50
<i>succulentum</i>	Easiest to grow. Young plants about 2 years from flowering size.	6.5	£5
<u>PEDILANTHUS</u>	Euphorbiaceae family, mostly short erect plants with small leaves	Pot Size	Price
<i>macrocarpus</i>	Blue grey stems up to 10cm diameter, tiny leaves at the tips of the stems.	6.5	£2
<u>PSEUDOLITHOS</u>	Asclepidaceae, globular to slightly erect plants from Somalia - rare	Pot Size	Price
<i>harardherianus</i>	New species, almost square in shape. Warty, greenish brown body, tiny brown flowers	6.5	£18.50
<i>miguirtinus</i>	Pale green body, egg shaped & warty – weird!	6.5 : 8.5	£18.50 : £22.50
<u>SECAMONE</u>	Small, tuber forming plants - no information at present!	Pot Size	Price
<i>sp. from Madagascar</i>	Erect thin stems from a small tuber, new species to us.	6.5	£3
<u>SININGIA</u>	Tuberous rooted group of plants in the Begonia family	Pot Size	Price
<i>leucotricha (Rechstieneria)</i>	Soft, silver, “felty” leaves from a small tuber, tubular red flowers	8.5	£5.50
<u>STAPELIA</u>	Tuberous rooted group of plants easy to flower	Pot Size	Price
<i>asteria</i>	Short upright stems with brown & green mottling	6.5	£4
<i>leendertziae</i>	Large growing form similar to <i>gigantea</i> . Probably has brown flowers	8.5	£3
<u>TALINUM</u>	Tuberous rooted group of plants easy to flower	Pot Size	Price
<i>natalensis</i>	Pale green leaves from a small tuber, tiny red flowers.	6.5	£3
<u>TILLANDSIAS</u>	Propagated from our own collection, many seldom offered		
<i>andicola</i>	Tiny grey, ladder-like stems. Very unusual	miniature	£1.50
<i>diaguitensis</i>	Thin, grey, hard stems, white scented flowers. Nice	small	£3
<i>paleacea</i>	Stiff hairy white leaves, ours are clustering	small	£3.50
<i>Sp. de Peru (paleacea form?)</i>	Very soft scaled silvery leaves, deep pink flowers, nice	small	£2
<i>tectorum</i>	Makes magnificent 20cm globes of feathery leaves. Small plants to grow on	medium	£3.50
<i>uesnioides</i>	Spanish moss. Grows well out of doors from May/September	medium	£2
<i>xerographica</i>	Stunning silver rosettes 15cm diameter. CITES 1 species – UK only!	medium	£10
