Species	Description	Pot Size	Price
<b>ARIOCARPUS</b>	<i>"Living Rock" plants - slow growing &amp; much sought after</i>	cm	GBP
agavoides ( <i>Neogomesia</i> )	Narrow dark green tubercles. Flowering size plants now 10 years old.	6.5	£5
fissuratus	Thick dark green tubercles, develops woolly centre with age. 9 years old.	6.5	£4
fissuratus	Grafted on short stocks – starting to become woolly so will flower shortly	6.5	£6
kotschoubeyanus	Rosette shaped plants, small triangular tubercles – 8 year old plants about 1.5 cm dia.	6.5	£4
kotschoubeyanus albiflorus	Rosette form plants, small triangular tubercles - flowering size, about 3cm.diameter.	6.5	<b>Sold Out</b>
kots. elephantidens	Rosette form plants, small triangular tubercles - flowering size, about 3cm.diameter.	6.5	£12.50
retusus & retusus SB68	Nice forms of A. retusus, some from Mesa garden seed - 10 year old plants.	6.5	£4
trigonus	Olive green tubercles, sharply pointed at the tips, large yellow flowers, 9 years old.	6.5	£5
trigonus fa. Aramberri	Similar to the type but with red/pink flowers – thought to be a retusus form by some	6.5	£5
<b>ASTROPHYTUM</b>	<i>Interesting plants, most are covered with white "spots"</i>	Pot Size	Price
asterias	Body flat to dome shaped. Yellow flowers, red centre. Large flowering sized plants	10 to16	£10 to £25
asterias "Super Kobuto"	Covered with variable white markings. Yellow flowers, usually with a red centre.	6.5	£3
capricorne	Long twisted black spines, pale green spotted body. Flowering size.	6.5:12	£2 : £7.50
capricorne v. crassispinum	Almost bare body, much thicker, stronger spines. Very nice form.	6.5 : 8.5	£2 : £3
myriostigma	Flowering size, "Bishops Cap" Larger plants available ex 14cm pots from £17.50	6.5	£2
myriostigma v. coahuillense	Dense white coating. Flowering size plants, flowers yellow with a red centre.	6.5 : 8.5	£2 : £3
myriostigma v. nudans	Glossy green 5 ribbed plants, no white spots. Large plants available from £25	6.5 : 8.5	£2 : £3
myriostigma fa."onzuka"	4 or 5 ribs, densely white flecked plants with interesting markings. Grafted @ £5	6.5	£4
myrio. v. quadricostata	Square plants for square pots! 4 ribbed plants, flowering size.	6.5 : 8.5	£2 : £3
"quadri-nudans"	Green 4 ribbed plants, no white spots. Unusual!	6.5	£3
ornatum	Nice white spotted form with strong brown/yellow spines Some large plants @ £35	6.5 :8.5:10.5	£2 : £3 : £6.50
<b>BLOSSFELDIA</b>	<i>Reputed to be the smallest of all cacti – from northern Argentina</i>	Pot Size	Price
lilliputana ( <i>grafted</i> )	Tiny, almost spineless clustering heads – yellow flowers. On short stocks	8.5	<b>Sold Out</b>
<b>COPIAPOA</b>	<i>We are pleased to offer plants grown from seed obtained on our 2006 trip to Chile</i>	Pot Size	Price
atacamensis	From Botija, about 500metres from the ocean. Grey stems cluster with age	6.5	£4
barquitensis	Non-habitat seed. Red bodied plants when young, straight black spines	8.5	£4
carrizalensis	Body becomes chalky coloured – strong black spines	6.5	£4
cinerascens BH64.01	Smaller, clustering olive green coloured bodies	6.5	<b>Sold Out</b>
cinerea BH57.01 & BH58.01	Most sought after form. Develops grey body with short black spines	6.5	£4
columnar alba BH62.01	Makes white columns with solitary spine from each areole	6.5	£4

dealbata BH68.01	Stems become chalky white with black marks at the rib edges, long black spines	6.5	£4
fiedleriana BH69.01	Olive green/red bodied plants, short spines, compact clustering growth	6.5	Sold Out
grandiflora BH62.02	Green body becoming grey with age. Short spines & larger flowers	6.5	£3
haseltoniana	Non-habitat seed. Gold body when young, becomes chalky with age. Yellow spines.	8.5	£4
haseltoniana BH52.01	Olive green bodies when young, becoming chalky with age. "gigantea" form.	6.5	£3
hypogea "lizard skin"	Cultivated form, olive green/brown body with wrinkled skin, yellow flowers	6.5	Sold Out
lauii	Almost subterranean bodied, will make mats of tiny heads. Yellow flowers – nice!	6.5	£4
longistaminea BH62.01	Red body when young, becoming chalky, long spines	6.5	£4
megarhiza BH65.01	Dark body on young plant, becomes grey green with age, small heads tap rooted FEW!	6.5	£4
rupestris BH59.01	Small growing plant, tap rooted. Body red while young.	6.5	£4
tenebrosa BH55.01	A giant up to 1mtr tall, Cinerea like & clustering. From the mountains above Taltal.	6.5	£4
<b><u>CORYPHANTHA</u></b>	<i>Mammillaria family. Compact plants from Mexico &amp; USA</i>	Pot Size	Price
andreae	Dark glossy green body, large yellow flowers.	6.5	£2
bisbeeana ( <i>Escobaria</i> )	Globular plants untidy pink coloured spines, Cochise Co. Arizona.	6.5	£3
cornifera	Clustering plant from the Big Bend area of Texas.	6.5	£3
garesii	Fat glossy green body, grey/white spines, yellow flowers. Grows large.	6.5	£2
greenwayii	Similar in appearance to above – large yellow flowers – nice large fat plants	12.5	Sold Out
nelliae ( <i>Escobaria</i> )	Pretty clustering miniature, red & straw coloured spines, pink flowers.	6.5	£2
sneedii ( <i>Escobaria</i> )	Dwarf plants making clusters of many heads, dense white spines.	6.5	£2
varicolor ( <i>Escobaria</i> )	Small globular plants, tight spination, pale pink flowers.	6.5	£2
vivipara ( <i>Escobaria</i> )	Globular spiny plants, large pink flowers. Cold tolerant, the most hardy!	6.5	£2
<b><u>DISCOCACTUS</u></b>	<i>Brazilian plants – unless grafted need ericaceous compost and high winter temps.</i>	Pot Size	Price
boomianus ( <i>grafted</i> )	Small headed form, clustering with short straw coloured spines	6.5	£4
estevesii ( <i>grafted</i> )	Fat green body with thick red/black spines, grows up to 20cm diameter	8.5	£7.50
ferricola ( <i>grafted</i> )	A giant of the group, making bodies up to 30cm diameter – large white flowers	8.5	£7.50
horstii ( <i>grafted</i> )	2cm diameter purple/black bodies – tiny black spines, various grafting stocks.	6.5	£7.50
<b><u>ECHINOCACTUS</u></b>	<i>Generally large growing species, a few smaller choice ones</i>	Pot Size	Price
grusonii	Popular "Golden Barrel" - or more unkindly "Mother in Law's seat"! Various sizes.	10.5=>	From £4.50
grusonii v. alba	Spines are a glassy white. Most of our plants are clusters. Various sizes.	10.5=>	From £4.50
grusonii v. inermis	"brevispina" form, attractive short spines on the typical globular body.	12.5	Sold Out
ingens	The "giant" echinocactus, grows to over 1mtr in height in habitat	6.5	£2
texensis	Flat grey green body, straw coloured spines, pink flowers. Tender! size	6.5	£2
<b><u>ECHINOCEREUS</u></b>	<i>Usually clustering, from miniatures to large clumps over 1 meter</i>	Pot Size	Price
adustus	Pretty black & white pectinate spined plants with large flowers. Flowering sized	6.5	£3

amoenus JLH950741	Short, tap rooted plants with large pink flowers. From wet grassy meadows!	6.5	£3
engelmannii JLH950812	A northern form with black & white spines, may be hardy.	6.5	£2
enneacanthus SB106	Clustering with age, untidy straw coloured spines & eventually huge flowers	6.5	£2
fasciculatus	Form of E. engelmannii from central Arizona, golden spines.	6.5	£2
fendleri var. eremiticus	Form with brown/white spines. Not a lot different to normal form!	6.5	£2
gentryi Lau 087	"Cucumber" - like stems, tiny spines, flowering size plants.	8.5 : 10.5	£3 : £4.50
knippelianus v. krugeri	Fat green body, soft bristly spines, flesh-coloured flowers from the plant centre.	6.5	£3
knippelianus v. reyesii	Fat bodies, stiffer spines. Larger, deep pink flowers from the centre of the plant.	6.5	£3
morricallii	A spineless E. scheerii type. Flowers low down on the sides of the pale green stems	8.5	£3
pectinatus v. rigidissimus	Arizona rainbow cactus. Pectinate spines in bands of colours down the plant body	6.5	£2
pectinatus v. rubra	Stunning red spines on our larger flowering sized plants. Easy flowering form	6.5	£2 : £3
pulchellus v. sharpii	White flowered, short bristly spines, more care with watering required.	6.5	£3
reichenbachii v. albispinus	Small growing plants with dense white spines, easily produced large pink flowers	6.5	£2
reichenbachii v. fitchii	Short columnar plants with dense white/grey spines, easy flowering large pink flowers	8.5	£3
rosei ( <i>Oro Grande form</i> )	Easy flowering plants from a population with many flower colours.	8.5	£3
stramineus JLH950764	From south of Samalayuca Mexico. Glassy white spines, robust stems.	8.5:10.5	£3 : £4.50
triglochidiatus JLH950825	Northern form, cluster forming plants. Quite hardy, spines typical of triglochidiatus.	8.5:10.5	£3 : £4.50
trig. v. octacanthus	Typical form from the Chisos basin, large glossy green stems & "claret cup" flowers	16	£12.50
triglochidiatus inermis	Totally spineless form! Much kinder on the fingers when re-potting!	8.5 : 10.5	£3 : £4.50
viridiflorus	This form grows to about 10cm high. Nice yellow/green flowered plants.	6.5	£3
weinbergii	Short pectinate spines on a tap rooted body. Pink flowers from the sides of the plant.	6.5	£3
<b><u>ECHINOFOSSULOCACTUS</u></b>	<i>Small, globular plants with thin ribs and bi-coloured flowers</i>	Pot Size	Price
coptogonus	Few broad ribs, looks more like a Ferocactus! Dagger like spines. Pink/white flowers	8.5	£3
crispatus	Many thin ribs, short dagger like spines, yellow/white flowers – flowering April/May	8.5	£3
lloydii	Long, thin papery spines with pink/white flowers – flowering April/May	8.5	<b>Sold Out</b>
phyllacanthus JLH950745	Many thin ribs, thin spines, just flowering size – flesh/white coloured flowers	6.5	£2
<b><u>EPITHELANTHA</u></b>	<i>Mostly miniatures with pink flowers &amp; red fruits</i>	Pot Size	Price
micromeris	From near Mud Mountain, New Mexico. Coarse white spines, pink flowers.	6.5	£3 & £6
<b><u>FEROCACTUS</u></b>	Small to large growing "Barrel Cacti" from Mexico & SW USA	Pot Size	Price
fordii DJF7	From Baja California. Flowers at a smaller size than most Ferocacti.	8.5	£3
glaucescens v. inermis	Unusual clustering plants, 0 to 1 yellow spine on pale green body.	12.5	<b>Sold Out</b>
gracilis	Bold red spines, dark green, plant body. Can grow to around football size	16	£15

<b>herrerae</b>	Large growing plant, strong re-curved brown spines, yellow flowers.	10.5	£4.50
<b>hystrix</b>	Pale grey/green body, strong, long, red & white spines. Can grow to 1 mtr. high!	10.5	£4.50
<b>latispinus</b>	Flat growing, broad yellow spines. Flowers pink/white, produced on 15cm plants	16	£15
<b>macrodiscus</b>	Flat growing plant with acute ribs. Flowering size plants ex 18cm pots @ £18 & £22.50	8.5 : 12.5	£3 : £6.50
<b>rectispinus</b>	Extremely long red spines from a blue grey body. Extra packing required for this one!	16	£10
<b>robustus</b>	From Tecomachalco Mexico. Makes small heads and clusters profusely.	8.5	£3
<b>schwarzii</b>	Dark green body with short yellow spines & acute ribs. Flowering size plants @ £25	8.5	£3
<b>viridescens</b>	Southern California & Baja. Produces green flowers while still small.	6.5 : 10.5	£2 : £4.50
<b><u>GEOHINTONIA</u></b>	<i>Relatively recent discovery from Mexico. Monotypic genus</i>	Pot Size	Price
<b>mexicana</b>	Blue/grey body, many acute ribs, tiny white spines, purple flowers. On own roots.	6.5	£7.50
<b><u>GYMNOCACTUS</u></b>	<i>Closely allied to Turbinicarpus but generally more spiny</i>	Pot Size	Price
<b>beguinii</b>	Small plants, dense black & white spines, large purple/pink flowers.	6.5	£4 & £5
<b>booleanus (grafted)</b>	Originally described as a Turbinicarpus, spination etc.looks more like a Gymnocactus	6.5	£5
<b>gielsdorfianus</b>	Blue bodies/black spines flowers almost white produced from the crown	6.5	<b>Sold Out</b>
<b>horripilus</b>	Clustering plants with black & white spines, pink flowers. Probably easiest to grow.	8.5	<b>Sold Out</b>
<b>knuthianus</b>	Fine, straw coloured spines, pink flowers FEW!	6.5	<b>Sold Out</b>
<b>subterraneus</b>	Weird thin neck from tuberous root with normal body above. Pink flowers	6.5	£6
<b>viereckii spec Lau 1159</b>	Lots of dark pink flowers on small spiny plants. Easiest to grow!	6.5	£2
<b>ysabellae</b>	Globular, golden spines, growing to 10cm. Pink/white flowers. Flowering sized plants.	6.5	£4
<b><u>GYMNOCALYCIUM</u></b>	<i>South American group, mostly small flattened plants</i>	Pot Size	Price
<b>castelanosii P80a</b>	Pale green body, rounded ribs, long straight spines.	6.5	£2
<b>hamatum</b>	Strongly tuberculate , brown bodied plants with dark brown curved spines.	6.5	£2
<b>megalothelos</b>	Glossy green body with curly spines that remind you of Polynesian tattoos!	6.5	£3
<b>mihanovichii</b>	Purple/red bodies, white spines, pink flowers. A popular sort	6.5	£2
<b>multiflorum</b>	Fat, pale green bodies, straw coloured flowers. Large growing species.	10.5	£4.50
<b>piltzorum P28</b>	Flattened brown body with erect stiff spines.	6.5	£2
<b>ragonesii</b>	Dwarf brown bodies, tiny spines, flesh-coloured flowers, slow!	6.5	£3
<b>saglione</b>	Large rounded tubercles, long curved spines. Grows to football size!	6.5	£2
<b><u>HAMATOCACTUS</u></b>	<i>Probably should be included with the Ferocactus group</i>	Pot Size	Price
<b>hamatacanthus</b>	Long red & white spines on a globular plant. From the Big Bend area of Texas.	8.5	£3
<b>setispinus</b>	Small globular plants with pale yellow spines, yellow flowers. From Texas hill country.	6.5	£2
<b><u>LEUCHTENBERGIA</u></b>	<i>Confuses many beginners with its un-cactus – like appearance</i>	Pot Size	Price
<b>principis</b>	Pink/blue “fingers” with long papery spines. Huge yellow flowers.	6.5 : 8.5	£3 : £4
<b><u>LOBIVIA</u> (inc. Chamaecereus)</b>	<i>Medium to small growing cacti. Free flowering &amp; easy cultivation.</i>	Pot Size	Price

bruchii	Plants forming large "barrels" with bright yellow spines.	6.5	£2
dobeana	Clustering Echinopsis type, brick red flowers.	6.5	£2
famatimensis	Attractive small plants with tiny pectinate spines on a red/green body. Yellow flowers	6.5	Sold Out
haematantha v. densispina	Small globular plants covered with dense grey spines. Yellow flowers.	6.5	Sold Out
sylvestrii cristate	Stems start normal but then crest at the tips. Easy flowering form.	6.5 : 8.5	£2 : £3
sylvestrii hybrid #1	Possibly a Lobivia hybrid. Robust stems, red flower. Easy flowering!	6.5	£2
sylvestrii hybrid #2	Possibly a Lobivia hybrid. Robust stems, different red flower. Easy flowering!	6.5	£2
schieliana WR207	Dark green clustering plants with dense, straw coloured spines. FEW!	8.5 : 10.5	£3 : £4.50
subnudans (Echinopsis)	Fat green bodies with large woolly areoles, flowers at small size.	6.5 : 10.5	£2 : £4
<u>LOPHOPHORA</u>	<i>The Czech. Society has published an interesting booklet on this group</i>	Pot Size	Price
echinata diffusa	Green body, white to cream coloured flowers. A few larger plants are available.	6.5	£3
fricci	Larger flowers, sometimes red. May be the same as L. w. decipiens - small plants	6.5	£3
jourdaniana	Clustering dark, blue green body, tiny spines on new growth - flower almost red	6.5	£5
williamsii	The common peyote. Some larger & clustering plants available from £25.	6.5	£4
<u>MAMMILLARIA</u>	<i>Miniature plants to large clustering sorts, generally free flowering</i>	Pot Size	Price
benecke	Clusters of small stems which detach easily – not good to pack!	6.5	Sold Out
boolii	Pale, blue/green bodied plants, black/white spines, pink flowers. From Baja California	6.5	£2
camptotricha	Very attractive "mme. marnier" form with short, yellow, strongly curved spines.	6.5	£2
celsiana	White radial spines, yellow centrals. Plant globular while young.	6.5	£2
chica	Appears to be similar to lasiacantha, different flower/colour	6.5	Sold Out
dixanthocentron	Long yellow central spines, red flowers. Nice tidy plants.	12.5	£6.50
elegans	Attractive short columnar plants, white radial, black central spines. Deep red flowers	6.5	£2
formosa	Compact flattened plants with white radial spines, darker centrals	6.5	£2
graesneriana	Slightly columnar plants covered with short yellow spines	10.5	£5
hahniana	Similar to celsiana but with more/less hairs from the axils. Good beginners plant.	6.5	£2
herrerae	Tiny white spined plants. Tap rooted form from Mexico. – Rare - Few!	6.5	Sold Out
hidalgensis var. inermis	Unusual, pale green spineless plant, dark red flowers!	6.5	£2
lasiacantha	The "Texas Golf Ball" – small solitary white globes with pink flowers	6.5	£4
lauri	Short, white spined form, many deep pink flowers. Will form clusters quickly.	6.5	£2
lenta	Flattened, clustering body with dense white spines. Tap root forming. Pink flowers.	6.5	£3
magnifica cristate	Contorted stems covered with fine white spines, occasional hooked centrals.	12	£7.50
magnimamma	Glossy dark green body, short spines. Will make large clusters eventually	8.5	£3
marksiana	Nice globular plants with bright yellow spines & flowers.	6.5 : 8.5	£2 : £3

matudae	Taller growing plant, olive green body with pectinate brown spines.	6.5 : 8.5	£2 : £3
matudae cristate	Fat contorted stems, attractive spines, ex 12cm bowls.	12	<b>Sold Out</b>
microthele	Extremely flattened plants with tiny hard spines. Almost subterranean in habitat.	8.5	£3
mystax	intertwined spines on mature plants. Rd. to Huajuapán de León, Tehuacán Mexico.	10.5	£4.50
napina	Big dark red flowers. Short, glassy spines, large taproot. Flowering April/May	8.5	£4 : £5
nejapensis	Globular, clustering with age. Long white spines, yellow flowers.	6.5 : 8.5	£2 : £3
parkinsonii	Eventually clustering, stems covered with stiff white spines.	6.5	£2
pectinifera ( <i>Solisia pectinata</i> )	Beautiful white spined plants on own roots. Another "golf ball"!	6.5	£4
perez de la rosa	Pretty, pink flowered plants. White radial spines, hooked black centrals.	6.5	£2 : £3
plumosa	Clusters of stems covered in dense soft white spines, white flowers.	8.5	£3
roseo-alba SB870-8	Magnimamma type, paler body + longer spines	6.5	£2
scheideana	Tap rooted. Golden yellow spines, dark green body, yellow flowers.	6.5 : 8.5	£2 : £3
senilis ( <i>Mammilopsis</i> )	Fine covering of hooked white spines. Large red flowers. Cold hardy.	10.5	£4
"Uno Pico"	From a <i>M. magnifica</i> sport, solitary central spines, red flowers.	6.5	£2
<b><u>MELOCACTUS</u></b>	<i>Cephalium forming plants from Central America. Larger plants available at nursery</i>	Pot Size	Price
matanzanus	Dwarf Cuban Melocactus. Flowering sized plants, orange cephalium.	12.5	<b>Sold Out</b>
<b><u>NEOPORTERIA</u></b>	<i>AWC = Alan Craig; BH = Burke/Henshaw collection nos.</i>	Pot Size	Price
chilensis	From various locations, red/green bodied plants, short, stiff yellow spines. AWC seed	8.5	£3
coimasensis AWC24, 553	Green bodied plants dense bristly straw/black spines. Two locations	8.5	£3
esmeraldana FK775	Large tap roots, tiny, almost black body, small orange/brown spines.	6.5	£2
huascoensis BH69.03	Almost black body with short black spines. From above Huasco	6.5	£3
krausii	Pretty, purple bodied plants with white, pectinate spines.	6.5	£3
multicolor AWC347	Dense straw coloured spines becoming long with age. Pink/white flowers	8.5	£3
napina v. spinosior AWC502	Body more red, spines more prominent, otherwise quite similar.	6.5	£2
nigrihorrida	From various locations, glassy black to straw coloured spines.	8.5	£3
occulta	Bronze/red bodied plants, almost spineless with chin shaped tubercles!	6.5	£3 & £4
paucicostata BH53.01	Almost black stems with short black spines – small, pretty plants	6.5	£3
paucicostata ( <i>viridis form</i> )	Glaucus blue stems with short black spines – attractive & much sought after!	6.5 : 9.5	£3 : £4.50
subgibbosa	Plants from several different locations, mostly yellow spines.	8.5	£3
Sp. AWC561 ( <i>nidus type?</i> )	Glassy white and black spines on small globular plants.	6.5	£3
Sp. from Paposo	Dark red bodied plant with long black spines	6.5	£3
<b><u>NOTOCACTUS</u></b>	<i>Generally easy growing &amp; flowering plants - good for beginners</i>	Pot Size	Price
claviceps	Similar to leninghausii but spination stiffer and not as dense	10.5	£4.50
leninghausii	Popular yellow spined plant, flowers when about 15cm high.	6.5	£2

magnificus	Blue body, yellow spines, yellow flowers. Forms clusters with maturity.	6.5	£2
turececkianus	Easily mistaken for submammulosus, this has longer, more papery spines	8.5	£4
<u>PELECYPHORA</u>	<i>10 year old plants on their own roots, very slow growing</i>	Pot Size	Price
asseliformis	Hatchet shaped tubercles + tiny grey spines, big tap roots for their size! Grafted @ £7.50	6.5	£9.50
strobiliformis	Looks like a green pinecone! Pink flowers, was formerly Encephalocarpus.	6.5	£8 : £15
<u>PYGMAECEREUS</u>	<i>South America's equivalent to Echinocereus!</i>	Pot Size	Price
akersii	Short, columnar clustering plants with dark, pectinate spines - . Hairy flower buds	6.5	<b>Sold Out</b>
<u>REBUTIA</u> including <i>Aylosteria</i> .	<i>Small clustering plants, free flowering &amp; easy cultivation. More plants unlisted –ask!</i>	Pot Size	Price
albopectinata	Short, pectinate white spines, similar to some Sulcorebutia forms.	6.5	£2
breviflora ( <i>sulcorebutia</i> )	Olive green body with straw coloured pectinate spines. Forms clusters of 3cm dia. heads	6.5	£2
fabrisii v. aurieflorea	Tiny clustering heads, fine white spines, yellow flowers	6.5	£2
heliosa	Sought after, densely pectinate spined plants, orange flowers.	6.5	£2
heliosa v. condorensis	Similar in appearance to Lobivia famatimensis - attractive plants.	6.5	£2
heliosa RH259	Pale green body, longer, untidy silvery spines.	6.5	£2
pulvinosa	Similar to fabrisii but spines shorter and stiffer, heads larger.	6.5	£2
<u>STROMBOCACTUS</u>	<i>Disk shaped plants inhabiting clay walled canyons in central Mexico</i>	Pot Size	Price
disciformis	Plants from 3cm diameter upward. Our oldest were sown in 1989!	6.5 : 8.5	£3 to £10
<u>SUBMATUCANA</u>	<i>Mountain plants from South America</i>	Pot Size	Price
madisoniorum	Looks like a pale green Lophophora! Red flowers, alpine horn shape.	8.5	£4
paucicostata	Clustering, spiny stems, also with red “Alpine Horn” flowers.	8.5	£3
<u>THELOCACTUS</u>	<i>A wide ranging group from Texas to Queretaro in Central Mexico</i>	Pot Size	Price
bicolor	Red and white flattened spines. Make huge pink flowers when 5-6cm.	6.5 : 8.5	£2 : £3
bicolor var. flavidispina	Fine straw coloured spines on clustering, smaller plants than the type.	6.5 : 8.5	£2 : £3
conothele	Olive green, prominently tubercled plants, long spines!	8.5	£3
conothele v. aurantiacus	White radial spines with darker centrals. Flowers orange/yellow – nice form!	6.5	£2
hastifer	Columnar plant, looks a bit like Gymnocactus subterraneus! Queretaro, Mexico.	6.5 : 8.5	£2 : £3
hexaedrophorus	Flat grey bodies with big taproots. Satin white to pink flowers. A few large plants @ £20	8.5	£3
lausseri	Similar form to T. bicolor but spines brown & white. Flower pink/white.	6.5 : 8.5	£2 : £3
lophothele	Grey body, long spines. Can grow to more than 15cm in diameter.	8.5	£3
matudae	Olive green body, large tubercles, deep purple/pink flowers.	6.5 : 8.5	£2 : £3
McDowellii	Covered in dense glassy white spines. Pink flowers – beautiful plants.	6.5 : 13.5	£2 : £12.50
nidulans	Blue/grey body, long curved black/brown spines. Pink flowers.	8.5 : 13.5	£3 : £12.50
rinconensis	Grey bodies, long spines, pink flowers- big plants ex 21cm bowls.	21	£15
<u>TRICHOCEREUS</u>	<i>Widespread group from South America, some grow to tree like proportions</i>	Pot Size	Price

chilensis AWC201	Large growing, glossy green plants with yellow spines - about 15cm high	12.5	£8.50
<b><u>TURBINICARPUS</u></b>	<i>Miniature cacti from central/northern Mexico mostly found growing among rocks</i>	Pot Size	Price
alonsoi	Dark green, stout tubercles with upright spines. Purple red flowers.	6.5	£4
andersonii ( <i>panarottoi</i> )	Flat, top shaped bodies, incurved spines, pink flowers in April.	6.5	£5
dickisoniae	Tiny stems, white radials, black centrals, white flowers.	6.5	£3
flaviflorus	Thin neck to a large taproot. Corky golden spines, dull flower.	6.5	£2
jauernigii	Chalky grey plant body, looks like a black spined Lophophora!	6.5	£3 & £6
krainzianus	Long bristly spines, similar to T. pseudomacrochele.	6.5	£4
krainzianus v. minimus	Weird! Long thin stems on large taproot. Small yellow flowers.	6.5	£3
lausseri	Looks like a black spined form of pseudomacrochele with greenish flowers	6.5	£4
lophophoroides	Biggest growing Turb. also the easiest to kill! Large pink flowers.	6.5	£3
macrochele	Small plants, curly dark spines, almost flat tubercles & big taproot.	6.5	£3
polaskii	Nice fat plants with corky spines, up to 3cm. diameter.	6.5	£4
pseudomacrochele	Flowers pink to white! Mature plants with large tap roots.	6.5	£3
pseudopectinatus	Often mistaken for a Pelecyphora - was Normanbokea – Grafted!	6.5	£5
pseudopectinatus cristate	Tight pectinate spines on a dark green body – Grafted!	6.5	<b>Sold Out</b>
schmiedickeanus	Small plant seldom offered these days. Nice pink flowers and corky, twisted spines	6.5	£6
swobodae	Small dark redish/grey body, elongate tubercles, black incurved spines	6.5	£3 & £5
valdezianus ( <i>Normanbokea</i> )	Flowers can be pink or white, spines are quite plumose. <i>As usual we have tried to list a good range of smaller caudiciform plants</i>	6.5	£3
<b><u>OTHER SUCCULENTS</u></b>
