Species	Description	Pot Size	Price
<u>ARIOCARPUS</u>	<i>"Living Rock" plants - slow growing & much sought after</i>	cm	GBP
agavoides (<i>Neogomesia</i>)	Narrow dark green tubercles. Flowering size plants now more than 10 years old	6.5	£5
fissuratus	Thick dark green tubercles, develops woolly centre with age. 10 years old	6.5	£4
fissuratus	Grafted on short stocks – starting to become woolly so will flower shortly	8.5	£7.50
kotschoubeyanus	Rosette shaped plants, small triangular tubercles – 8 year old plants about 1.5cm dia.	6.5	£4
kots. elephantidens	Rosette form plants, small triangular tubercles - flowering size, about 3cm.dia.	6.5	£15.00
retusus & retusus SB68	Nice forms of A. retusus, some from Mesa garden seed - 10 year old plants	6.5	£5
trigonus	Olive green tubercles, sharply pointed at the tips, large yellow flowers, 9 years old	6.5	£5
trigonus fa. Aramberri	Similar to the type but with red/pink flowers – thought to be a retusus form by some	6.5	£5
trigonus fa. Aramberri	Grafted on short stocks – variable tubercle length sizes	6.5	£7.50
<u>ASTROPHYTUM</u>	<i>Interesting plants, most are covered with white "spots"</i>	Pot Size	Price
asterias	Body flat to dome shaped. Yellow flowers, red centre. Large plants - FEW	16	£25
capricorne	Long twisted black spines, pale green spotted body. Flowering size	12	£7.50
capricorne v. crassispinum	Almost bare body, much thicker, stronger spines. Very nice form	6.5	£3
myriostigma	Flowering size, "Bishops Cap" Larger plants available ex 14cm pots from £17.50	6.5	£2
myriostigma nudans	The plain green form without white spots. Large columnar plants, flowering May	14	£17.50
myriostigma v. coahuillense	Dense white coating. Flowering size plants, flowers yellow with a red centre	6.5	£3
myriostigma fa."onzuka"	4 or 5 ribs, densely white flecked plants with interesting markings. Some grafted @ £6	6.5	£6
myrio. v. quadricostata	Square plants for square pots! 4 ribbed plants, flowering size	6.5 : 8.5	£2 : £3
myrio. v. "tricostata"	White spotted, 3 ribbed plants, unusual. Grafted	6.5	£6
quadricostata v. nutans	Glossy green 4 ribbed plants, no white spots – unusual form	6.5	£3
ornatum	Nice white spotted form with strong brown/yellow spines. Various sizes available	6.5 =>10.5	£2 => £6.50
<u>BLOSSFELDIA</u>	<i>Reputed to be the smallest of all cacti – from northern Argentina</i>	Pot Size	Price
pedicillata (<i>grafted</i>)	Tiny, almost spineless clustering heads – yellow flowers. On short stocks	8.5	£6
<u>COPIAPOA</u>	<i>We are pleased to offer plants grown from seed obtained on our 2006 trip to Chile</i>	Pot Size	Price
atacamensis	From Botija, about 500m from the ocean. Grey stems cluster with age - FEW	6.5	Sold
barquitensis	Non-habitat seed. Red bodied plants when young, straight black spines	8.5	£4
bridgesii Lau829	Green bodied, clustering with age. Long brown spines & yellow flowers	8.5	Sold
cinerascens BH64.01	Smaller, clustering olive green coloured bodies	6.5	Sold
cinerea BH57.01 & BH58.01	Most sought after form. Develops grey body with short black spines	6.5	£4
columnar alba BH62.01	Makes white columns with solitary spine from each areole	6.5	£4

dealbata BH68.01	Stems become chalky white with black marks at the rib edges, long black spines - FEW	6.5	£4
fiedleriana BH69.01	Olive green/red bodied plants, short spines, compact clustering growth - FEW	6.5	£4
grandiflora BH62.02	Green body becoming grey with age. Short spines & larger flowers	6.5	£4
haseltoniana	Non-habitat seed. Gold body when young, becomes chalky with age. Yellow spines	8.5	£4
haseltoniana BH52.01	Olive green bodies when young, becoming chalky with age. "gigantea" form	6.5	£4
hypogea "lizard skin"	Cultivated form, olive green/brown body with wrinkled skin, yellow flowers	6.5	£4
megarhiza BH65.01	Dark body on young plant, becomes grey green with age, small heads tap rooted FEW!	6.5	Sold
rupestris BH59.01	Small growing plant, tap rooted. Body red while young	6.5	£4
tenebrosa BH55.01	A giant up to 1mtr tall, Cinerea like & clustering. From the mountains above Taltal	6.5	£4
<u>CORYPHANTHA</u>	<i>Mammillaria family. Compact plants from Mexico & USA</i>	Pot Size	Price
andreae	Dark glossy green body, large yellow flowers	6.5	£2
bisbeeana (<i>Escobaria</i>)	Globular plants untidy pink coloured spines, Cochise Co. Arizona	6.5	£3
cornifera	Clustering plant from the Big Bend area of Texas	6.5	£3
elephantidens	Large flowers – nice big fat glossy green pants, lots of wool in axils	12.5	£12.50
nelliae (<i>Escobaria</i>)	Pretty clustering miniature, red & straw coloured spines, pink flowers	6.5	£2
sneedii (<i>Escobaria</i>)	Dwarf plants making clusters of many heads, dense white spines	6.5	£2
varicolor (<i>Escobaria</i>)	Small globular plants, tight spination, pale pink flowers	6.5	£2
vivipara (<i>Escobaria</i>)	Globular spiny plants, large pink flowers. Cold tolerant, the most hardy!	6.5	£2
<u>DISCOCACTUS</u>	<i>Brazilian plants – unless grafted need ericaceous compost and high winter temps.</i>	Pot Size	Price
boomianus (<i>grafted</i>)	Small headed form, clustering with short straw coloured spines	6.5	£4
ferricola (<i>grafted</i>)	A giant of the group, making bodies up to 30cm diameter – large white flowers	8.5	£7.50
horstii (<i>grafted</i>)	2cm diameter purple/black bodies – tiny black spines, various grafting stocks	6.5	£7.50
<u>ECHINOCACTUS</u>	<i>Generally large growing species, a few smaller choice ones</i>	Pot Size	Price
grusonii	Popular "Golden Barrel" - or more unkindly "Mother in Law's seat"! From £4.50	10.5	£4.50
grusonii v. alba	Spines are a glassy white. Most of our plants are clusters. Various sizes from £4.50	10.5	£4.50
grusonii v. inermis	"brevispina" form, attractive short spines on the typical globular body	10.5	£6.50
ingens	The "giant" echinocactus, grows to over 1mtr in height in habitat	6.5	£2
texensis	Flat grey green body, straw coloured spines, pink flowers. Tender! size	6.5	£2
<u>ECHINOCEREUS</u>	<i>Usually clustering, from miniatures to large clumps over 1m</i>	Pot Size	Price
adustus	Pretty black & white pectinate spined plants with large flowers. Flowering sized	8.5	£3
amoenus JLH950741	Short, tap rooted plants with large pink flowers. From wet grassy meadows!	6.5	£3
brandegei	Multi-stemmed plants with white & black dagger like spines. Just clustering	6.5	Sold
engelmannii JLH950812	A northern form with black & white spines, cold tolerant	6.5	£2
enneacanthus SB106	Clustering with age, untidy straw coloured spines & eventually huge flowers	6.5	£2

fasciculatus	Form of E. engelmannii from central Arizona, golden spines	6.5	£2
fendleri var. eremeticus	Form with brown/white spines. Not a lot different to normal form!	6.5	£2
fitchii	Short columnar plants with dense white/grey spines, easy flowering large pink flowers	8.5	£3
fitchii v. albertii	Similar to above, but much darker spines, easy flowering large pink flowers	8.5	£3
gentryi Lau 087	"Cucumber" - like stems, tiny spines, flowering size plants	10.5	£4.50
knippelianus v. krugeri	Fat green body, soft bristly spines, flesh-coloured flowers from the plant centre	6.5	£3
knippelianus v. reyesii	Fat bodies, stiffer spines. Larger, deep pink flowers from the centre of the plant	6.5	£3
morricallii	A spineless E. scheerii type. Flowers low down on the sides of the pale green stems	6.5	£2
pectinatus v. rubra	Stunning red spines on our larger flowering sized plants. Easy flowering form	6.5	£2 : £3
pulchellus v. sharpii	White flowered, short bristly spines, more care with watering required	6.5	£3
reichenbachii v. albispinus	Small growing plants with dense white spines, easily produced large pink flowers	6.5	£2
rosei (Oro Grande form)	Easy flowering plants from a population with many flower colours	8.5	£3
stramineus JLH950764	From south of Samalayuca Mexico. Glassy white spines, robust stems	10.5	£4.50
triglochidiatus JLH950825	Northern form, cluster forming plants. Quite hardy, spines typical of triglochidiatus	10.5	£4.50
triglochidiatus inermis	Totally spineless form! Much kinder on the fingers when re-potting!	8.5	£4.50
weinbergii	Short pectinate spines on a tap rooted body. Pink flowers from the sides of the plant	8.5	£4
<u>ECHINOFOSSULOCACTUS</u>	<i>Small, globular plants with thin ribs and bi-coloured flowers</i>	Pot Size	Price
coptogonus	Few broad ribs, looks more like a Ferocactus! Dagger like spines. Pink/white flowers	6.5	£3
lloydii	Long, thin papery spines with pink/white flowers – flowering April/May	6.5	£2
phyllacanthus JLH950745	Many thin ribs, thin spines, just flowering size – flesh/white coloured flowers	6.5	£2
<u>EPITHELANTHA</u>	<i>Mostly miniatures with pink flowers & red fruits</i>	Pot Size	Price
micromeris	From near Mud Mountain, New Mexico. Coarse white spines, pink flowers	6.5	£3
<u>FEROCACTUS</u>	Small to large growing "Barrel Cacti" from Mexico & SW USA	Pot Size	Price
emoryi	Nice blue-bodied plants with vibrant red spines – grows large	6.5 : 12	£2 : £6.50
glaucescens v. inermis	Unusual clustering plants, 0 to 1 yellow spine on pale green body	16	Sold
gracilis	Bold red spines, dark green, plant body. Can grow to around football size	6.5 : 16	£2 : £15
herreriae	Large growing plant, strong re-curved brown spines, yellow flowers	10.5	£4.50
hystrix	Pale grey/green body, strong, long, red & white spines. Can grow to 1m high!	10.5	£4.50
latispinus	Flat growing, broad yellow spines. Flowers pink/white, plants ex 16cm pots @ £10	8.5 : 10	£3 : £6.50
macrodiscus	Flat growing plant with acute ribs. Flowering size plants ex 18cm pots @ £20	8.5 : 12.5	£3 : £6.50
robustus	From Tecomachalco Mexico. Makes small heads and clusters profusely	8.5	£3
schwarzii	Dark green body with short yellow spines & acute ribs. Flowering size plants @ £25	8.5	£3

viridescens	Southern California & Baja. Produces green flowers while still small	6.5 : 8.5	£2 : £3
<u>GEOHINTONIA</u>	<i>Relatively recent discovery from Mexico. Monotypic genus</i>	Pot Size	Price
mexicana	Blue/grey body, many acute ribs, tiny white spines, purple flowers. On own roots	6.5	£7.50
<u>GYMNOCACTUS</u>	<i>Closely allied to Turbinicarpus but generally more spiny</i>	Pot Size	Price
beguinii	Small plants, dense black & white spines, large purple/pink flowers	6.5	£4 & £5
booleanus (grafted)	Originally described as a Turbinicarpus, spination etc. looks more like a Gymnocactus	6.5	£5
subterraneus	Weird thin neck from tuberous root with normal body above. Pink flowers	6.5	£6
viereckii spec Lau 1159	Lots of dark pink flowers on small spiny plants. Easiest to grow!	6.5	£2
ysabellae	Globular, golden spines, growing to 10cm. Pink/white flowers. Flowering sized plants	6.5 : 8.5	£4 : £6.5
<u>GYMNOCALYCIUM</u>	<i>South American group, mostly small flattened plants</i>	Pot Size	Price
hamatum	Strongly tuberculate , brown bodied plants with dark brown curved spines	6.5	£2
megalothelos	Glossy green body with curly spines that remind you of Polynesian tattoos!	6.5	£3
mihanovichii	Purple/red bodies, white spines, pink flowers. A popular sort	6.5	£2
piltzorum P28	Flattened brown body with erect stiff spines	6.5	£2
ragonesii	Dwarf brown bodies, tiny spines, flesh-coloured flowers, slow!	6.5	£3
saglione	Large rounded tubercles, long curved spines. Grows to football size!	6.5	£2
<u>HAMATOCACTUS</u>	<i>Probably should be included with the Ferocactus group</i>	Pot Size	Price
hamatacanthus	Long red & white spines on a globular plant. From the Big Bend area of Texas	8.5	£3
setispinus	Small globular plants with pale yellow spines, yellow flowers. From Texas hill country	6.5	£2
<u>LEUCHTENBERGIA</u>	<i>Confuses many beginners with its un-cactus – like appearance</i>	Pot Size	Price
principis	Pink/blue “fingers” with long papery spines. Huge yellow flowers	8.5 : 12.5	£4 : £6.50
<u>LOBIVIA</u>	<i>(inc. Chamaecereus) Mostly small growing cacti. Free flowering & easy cultivation.</i>	Pot Size	Price
bruchii	Plants forming large "barrels" with bright yellow spines	6.5	£2
dobeana	Clustering Echinopsis type, brick red flowers	6.5	£2
“Moonglow” (Echinopsis)	Pale green body, short spines, nice cream coloured flower	6.5	Sold
sylvestrii cristate	Stems start normal but then crest at the tips. Easy flowering form	6.5 : 8.5	£2 : £3
sylvestrii hybrid #2	Possibly a Lobivia hybrid. Robust stems, different red flower. Easy flowering!	6.5	£2
subnudans (Echinopsis)	Fat green bodies with large woolly areoles, flowers at small size	6.5 : 10.5	£2 : £4
<u>LOPHOPHORA</u>	<i>The Czech. Society has published an interesting booklet on this group</i>	Pot Size	Price
echinata diffusa	Green body, white to cream coloured flowers. A few larger plants are available	6.5	£4
fricci	Larger flowers, sometimes red. May be the same as L. w. decipiens - small plants	6.5	£4
jourdaniana	Clustering dark, blue green body, tiny spines on new growth - flower almost red	6.5	£6
williamsii	The common peyote. Spineless “dumplings” with tufts of hairs. Pink flowers	6.5	£4
<u>williamsii caespitosa</u>	A densely clustering form with many small heads around a larger, flowering sized one	6.5	£6

MAMMILLARIA	<i>Miniature plants to large clustering sorts, generally free flowering</i>	Pot Size	Price
albilananta	Pretty, short white spined plants with dark pink flowers & lots of wool in the axils	8.5	£4
bocasana multilanata cv.	Cristate stems with lots of white wool and hooked red spines. Pale yellow flowers	8.5	£4
camptotricha	“Birds nest” form with long, thin yellow, bristly curved spines	6.5	£2
camptotricha var.	Very attractive "Mme. Marnier" form with short, yellow, strongly curved spines	6.5	£2
candida	Solitary globular plants that can reach football size. Pink & white spines, pink flowers	10.5	£4.50
celsiana	White radial spines, yellow centrals. Plant globular while young	6.5	£2
duweii	Pubescent white spines on small clustering bodies. Bright yellow flowers	8.5	£3
elegans	Attractive short columnar plants, white radial, black central spines. Deep red flowers	8.5	£3
graesneriana	Slightly columnar plants covered with short yellow spines	10.5	£5
hahniana	Similar to celsiana but with more/less hairs from the axils. Good beginner plant	6.5	£2
hidalgensis var. inermis	Unusual, pale green spineless plant, dark red flowers!	8.5	£3
huitzilpotchlii	Solitary, olive green stems with short brown pectinate spines & tiny red flowers – Nice!	6.5	£4
lasiacantha	The “Texas Golf Ball” – small solitary white globes with pink flowers	6.5	£4
laui	Short, white spined form, many deep pink flowers. Starting to form clusters	8.5	£3
magnifica cristate	Contorted stems covered with fine white spines, occasional hooked centrals	12	£7.50
magnimamma	Glossy dark green body, short spines. Will make large clusters eventually	8.5	£3
marksiana	Nice globular plants with bright yellow spines & flowers	6.5 : 8.5	£2 : £3
matudae	Taller growing plant, olive green body with pectinate brown spines.	6.5 : 8.5	£2 : £3
matudae cristate	Fat contorted stems, attractive spines, ex 12cm bowls	12	£7.50
napina	Big dark red flowers. Short, glassy spines, large taproot. Flowering April/May	8.5	£5
nejapensis	Globular, clustering with age. Long white spines, yellow flowers	10.5	£4
parkinsonii	Eventually clustering, stems covered with stiff white spines	6.5	£2
pectinifera	<i>(Solsia pectinata)</i> Beautiful white spined plants on own roots. Another “golf ball”!	6.5	£4
perez de la rosa	Pretty, pink flowered plants. White radial spines, hooked black centrals	6.5	£3
plumosa	Clusters of stems covered in dense soft white spines, white flowers	8.5	£3
sanchez mejoradae	Tiny heads covered with plumose white spines, pinl flowers. Grafted	6.5	£4
scheideana	Tap rooted. Golden yellow spines, dark green body, yellow flowers	8.5	£3
schwarzii	Fine, glassy white spines covering small clustering heads. Tiny yellow flowers	12	Sold
senilis (<i>Mammilopsis</i>)	Fine covering of hooked white spines. Large red flowers. Cold hardy	8.5	£4
“Uno Pico”	From a M. magnifica sport, solitary central spines, red flowers	6.5	£2
viescensis	Similar to a lasiacantha but with occasional strong straight central spine	6.5	£3

<u>MELOCACTUS</u>	<i>Cephalium forming plants from Central America. Larger plants available at nursery</i>	Pot Size	Price
matanzanus	Dwarf Cuban Melocactus. Flowering sized plants, orange cephalium	12.5	£8.5
<u>NEOPORTERIA</u>	<i>AWC = Alan Craig; BH = Burke/Henshaw collection nos</i>	Pot Size	Price
chilensis	From various locations, red/green bodied plants, short, stiff yellow spines. AWC seed	8.5	£3
coimasensis AWC24, 553	Green bodied plants dense bristly straw/black spines. Two locations	8.5	£3
esmeraldana FK775	Large tap roots, tiny, almost black body, small orange/brown spines	6.5	£2
gerocephala	Globular plants with long bristly, intertwined spines, pink/white flowers	8.5	£4
huascoensis BH69.03	Almost black body with short black spines. From above Huasco	6.5	£3
krausii	Pretty, purple bodied plants with white, pectinate spines	6.5	£3
multicolor AWC347	Dense straw coloured spines becoming long with age. Pink/white flowers	8.5	£3
napina	Interesting plants with large tap root, olive green body, tiny spines, large pale flowers	6.5	£4
napina v. spinosior AWC502	Body more red, spines more prominent, otherwise quite similar	6.5	£2
nigrihorrida	From various locations, glassy black to straw coloured spines	8.5	£3
occulta	Bronze/red bodied plants, almost spineless with chin shaped tubercles!	8.5	£4
paucicostata BH53.01	Almost black stems with short black spines – small, pretty plants	6.5	£3
subgibbosa	Plants from several different locations, mostly yellow spines	8.5	£3
Sp. from Paposo	Dark red bodied plant with long black spines	6.5	£3
<u>NOTOCACTUS</u>	<i>Generally easy growing & flowering plants - good for beginners</i>	Pot Size	Price
buiningii	Blue-green body, thin ribs, white spines. Large yellow flowers. Slightly tender	8.5	£4
Buiningii cristate	Crested form of above. Stems just starting to elongate	8.5	£4
claviceps	Similar to leninghausii but spination stiffer and not as dense, plants more globular	10.5	£4.50
leninghausii	Popular yellow spined plant, flowers when about 15cm high	6.5	£2
leninghausii albispina	Novelty! Unusual white spined variant. Only offered by us once before	8.5	£4
magnificus	Blue body, yellow spines, yellow flowers. Forms clusters with maturity	8.5	£3
turececkianus	Easily mistaken for submammulosus. Longer, more papery spines, bigger flowers	8.5	£4
werdemannianus	Short columnar plants with erect yellow spines on light green body	6.5	£2
<u>OBREGONIA</u>	<i>5 year old plants on their own roots, shade loving</i>	Pot Size	Price
denegrii	Rhomboid shaped grey green tubercles with short, straw coloured spines, tap rooted	6.5	£3.50
<u>PELECYPHORA</u>	<i>10 year old plants on their own roots, very slow growing</i>	Pot Size	Price
asseliformis	Hatchet shaped tubercles + tiny grey spines, big tap roots!	6.5	£9.50
<u>REBUTIA including Aylosteria.</u>	<i>Small clustering plants, free flowering & easy cultivation. More plants unlisted –ask!</i>	Pot Size	Price
breviflora (sulcorebutia)	Olive green body / straw coloured pectinate spines. Forms clusters 3cm dia. heads	6.5	£2
fabrisii v. auriflora	Tiny clustering heads, fine white spines, yellow flowers	6.5	£2
heliosa	Sought after, densely pectinate spined plants, orange flowers	6.5	£3

heliosa v. condorensis	RH283 form. Coarser spination - attractive plants. Free flowering	6.5	£2
heliosa RH259	Pale green body, longer, untidy silvery spines	6.5	£2
huarinensis	Dark bodies, longish white spination, dark red flowers, clustering	6.5	£2
misquensis KK1927	Untidy white spines, red flowers. Now making clusters	8.5	£3
pulvinosa	Similar to fabrisii but spines shorter and stiffer, heads larger	6.5	£2
<u>STROMBOCACTUS</u>	<i>Disk shaped plants inhabiting clay walled canyons in central Mexico</i>	Pot Size	Price
disciformis	Plants from 3cm diameter upward. Our oldest were sown in 1989!	6.5 : 8.5	£3 to £10
<u>SUBMATUCANA</u>	<i>Mountain plants from South America</i>	Pot Size	Price
madisoniorum	Looks like a pale green Lophophora! Red flowers, alpine horn shape	8.5	£4
<u>THELOCACTUS</u>	<i>A wide ranging group from Texas to Queretaro in Central Mexico</i>	Pot Size	Price
bicolor	Red and white flattened spines. Make huge pink flowers when 5-6cm.	8.5	£3
bicolor var. bolaensis	White spines on clustering plants. Flowers smaller than the type	8.5	£3
bicolor var. flavidispina	Fine straw coloured spines on clustering, smaller plants than the type	6.5	£2
conothele	Olive green, prominently tubercled plants, long spines!	8.5	£3
conothele v. aurantiacus	White radial spines with darker centrals. Flowers orange/yellow – nice form!	6.5	£3
hastifer	Columnar plant, looks a bit like Gymnocactus subterraneus! Queretaro, Mexico	6.5	£2
hexaedrophorus	Flat grey bodies with big taproots. White to pink flowers. A few large plants @ £20	8.5	£3
lausseri	Similar form to T. bicolor but spines brown & white. Flower pink/white	6.5	£3
lophothele	Grey body, long spines. Can grow to more than 15cm in diameter	8.5	£3
matudae	Olive green body, large tubercles, deep purple/pink flowers	6.5 : 8.5	£2 : £3
McDowellii	Covered in dense glassy white spines. Pink flowers – beautiful large plants @ £12.50	6.5	£2
nidulans	Blue/grey body, long curved black/brown spines. Pink flowers. Large plants @ £12.50	8.5	£3
rinconensis	Grey bodies, long spines, pink flowers- big plants ex 21cm bowls	21	£15
<u>TRICHOCEREUS</u>	<i>Widespread group from South America, some grow to tree like proportions</i>	Pot Size	Price
chilensis AWC201	Large growing, glossy green plants with yellow spines - about 15cm high	12.5	£8.50
<u>TURBNICARPUS</u>	<i>Miniature cacti from central/northern Mexico mostly found growing among rocks</i>	Pot Size	Price
alonsoi	Dark green, stout tubercles with upright spines. Purple red flowers	6.5	£4
dickisoniae	Tiny stems, white radials, black centrals, white flowers	6.5	£3
flaviflorus	Thin neck to a large taproot. Corky golden spines, dull flower	6.5	£2
jauernigii	Chalky grey plant body, looks like a black spined Lophophora!	6.5	£3 & £6
krainzianus	Long bristly spines, similar to T. psedomacrochele	6.5	£4
krainzianus v. minimus	Weird! Long thin stems on large taproot. Small yellow flowers	6.5	£3
lophophoroides	Biggest growing of the Turbinicarpus group, also the easiest to kill! Pink flowers	6.5	£3
macrochele	Small plants, curly dark spines, almost flat tubercles & big taproot	6.5	£3

polaskii	Nice fat plants with corky spines, up to 3cm. diameter	6.5	£4
pseudomacrochele	Flowers pink to white! Mature plants with large tap roots.	6.5	£3
pseudopectinatus	Often mistaken for a Pelecyphora - was Normanbokea – Also on graft @ £4	6.5	£4
schmiedickeanus	Small plant seldom offered these days. Nice pink flowers and corky, twisted spines	6.5	£6
swobodae	Small dark reddish/grey body, elongate tubercles, black incurved spines	6.5	£3 & £5
valdezianus	<i>(Was Normanbokea)</i> Flowers can be pink or white, spines are quite plumose	6.5	£3
<u>OTHER SUCCULENTS</u>			
<u>ADENIA</u>	<i>Passifloraceae group from Africa – winter dormant</i>	Pot Size	Price
spinosa	Large growing, columnar blue/green caudex, branching with pale green leaves	12	£15
<u>ADENIUM</u>	<i>Apocynaceae family. Best grown as a houseplant as rather tender!</i>	Pot Size	Price
bohemianum	Small plants 10 -15cm tall, silvery branching caudex, pale, rounded leaves	8.5	£6
obesum	Our own seed grown plants about 5cm high, a little way off flowering size!	6.5	£3
obesum	Large bulb based plants – please check for postage!	15	£25
obesum hybrids	Various flower colours, nice large plants flowering now	10.5	£9.50
<u>ADROMISCHUS</u>	<i>Crassulaceae family – succulent leaves from semi-caudiciform bases</i>	Pot Size	Price
hemisphaericus	Short spreading branches densely covered with mottled green leaves, tuberous root	6.5	£2
<u>AGAVE</u>	<i>From miniatures to giant plants, some are almost hardy in the UK</i>	Pot Size	Price
americana medio-picta alba	Striking, large growing species with a broad central stripe	16	£10
colimana	Soft narrow leaves with pale centres, curling fibres at the edges. From Colina Mexico	6.5	£3
leopoldii	Magnificent rosettes of narrow leaves with curling fibres at the edges – attractive!	18	£25
macroacantha	Will make an upright rosette of narrow blue green leaves with black terminal spine	8.5	£3
oroensis	Glossy grey/green leaves - probably grows big!	10.5	£4.50
parrasana	From Parras, Mexico. Grey leaves with attractive teeth and imprinting on the leaves	16	£4.50
parryi variegata	Compact form with attractive white/yellow variegation along the leaf	12	£15
schidigera	Filiferous leaves, dark glossy green. Grows above the Durango snow line	6.5	£3
schottii	A filiferous type with white fibres at the dark green leaf edges	10.5	£4.50
sp. Bustamente Tamaulipas	Small grey green leaves. As yet we have no more information on this one	6.5	£2
stricta	Will eventually form a hemisphere of thin stiff leaves up to 1mtr diameter	6.5 : 8.5	£2 : £3
titanota	Bold white/brown teeth on broad olive green leaves – Nice!	12	£8.50
univittata quadricolour	Lophantha type with highly variegated red/yellow/green leaves - FEW!	12	£15
utahensis	Narrow grey leaves with a long terminal spine. Cold but not damp tolerant!	8.5	£4
vershafeldtii fm.	Pale blue green leaves with red “teeth” – nice, but appearance unlike the normal form!	12	£5
vilmoriniana	Soft green leaves without thorny edge! Fairly tender	10.5	£4.50
victoria regina	Stiff dark green leaves with white markings, justifiably popular. Large – check postage!	25	£20

<u>ALOE</u>	<i>We are currently propagating many choice dwarf Aloe hybrids! Ask if interested</i>	Pot Size	Price
albiflora	Clustering with upright, thin dark coloured leaves. White flowers produced in winter	6.5	£3
bellatula	Clustering with thin dark red leaves. Similar appearance to albiflora, different flower	8.5	£4
“Bedford’s Beau” (P Bedford)	UK produced hybrid using A. deltoideodenta as a parent. Vey pretty & dwarf	6.5	£4
“Brazen” (Phil Bedford)	Bronze red leaves, easy flowering and clustering. Dwarf hybrid produced in UK	6.5	£3
camperi	Upright dark green leaves edged with red “teeth”	8.5	£3
conifera	Pretty blue leaves covered in red spikes and teeth. From Madagascar	6.5	£3
cooperi	Tall growing stemless grass aloe, narrow spotted leaves that grow to 1m in length	8.5	£5
descoingsii	Pretty, dwarf Madagascar species with spotted triangular leaves	6.5	£2
dichotoma	The African “quiver tree” Slow growing, flowers at about 1mtr high	6.5	£3
greatheadii v. davyana	Large growing form, dark glossy green leaves	8.5	£3
haworthioides	Miniature with almost “hairy” dark green leaves. Clusters slowly to make a nice clump	6.5	£3
“Hey Babe” ISI 89-36	Hybrid of A. descoingsii. Leaves are similar but larger and blue-grey. Red flowers	8.5	£3.50
longibracteata	Narrow, dark green almost black leaves with white markings	8.5	£3
“Midnight” ISI 94-18	Dark red/black leaves, occasional white spots. Dwarf American hybrid. Free flowering	6.5	£3
“Midnight Child” (P.Bedford)	UK hybrid, offspring of above. Stunning almost black leaves with white teeth	6.5	£3
“Midnight Feast” (P.Bedford)	Another offspring of above. Pretty dark leaves with numerous white dashes	6.5	£3
parallelifolia	Thin, upward pointing bronze coloured leaves in opposing pairs	6.5	£3
plicatilis	Attractive toothless blue leaves in a fan shape. Flowers at about 25cm high	6.5	£3
“Pepe” ISI 95-19	A. haworthioides x A. descoingsii. Attractive dwarf plant	6.5	£2
“Snowflake”	Extremely white leaved hybrid. Slightly tender, clustering with age. Free flowering	6.5	£3
“Sparkling Burgundy”	ISI94-19 - Pretty, red leafed hybrid. Easy flowering like all of the dwarf ISI products	6.5	£3
rauhii x somaliense	Broad, dark purple/red leaves with rough white markings on tops. Nice form	6.5	£3
rauhii “White Diamonds”	Similar to “Lizard Lips” but different leaf pattern. Small growing and easy flowering	6.5	£3
vossii	Pale narrow green leaves similar to A. cooperi – grass Aloe – interesting!	6.5	£3
<u>ANACAMPSEROS</u>	<i>Portulacaceae family – small plants with slightly tuberous roots</i>	Pot Size	Price
telaphiastrum	Green to brownish leaves with bristly hairs from the bases, stems to 5cm. Pink flowers	6.5	£2
<u>AVONIA</u>	<i>Portulacaceae family – miniature plants with small spreading caudexes</i>	Pot Size	Price
quinaria ssp. alstonii	Tiny silvery leaves on short stems from top shaped caudex. White flowers	6.5	Sold
quinaria ssp. quinaria	Tiny silvery leaves, short stems from a top shaped caudex. Pink flowers	6.5	Sold
<u>CALIBANUS</u>	<i>The leaves of this plant are used for thatching in Mexico!</i>	Pot Size	Price
hookeri	Thin, sharp edged leaves from a corky caudex. From our own seed!	8.5	£4
<u>CYRTANTHUS</u>	<i>Bulb like plants with tiny flowers</i>	Pot Size	Price

smithiae	Thin blue, erect curling leaves from bulbous base – interesting plants!	6.5	£2
<u>DIOSCOREA</u>	<i>Yam family, D. elephantipes was the source of the drug cortisone</i>	Pot Size	Price
elephantipes	The famous elephants' foot! Makes huge tubers up to 1 metre diameter	8.5	£7.50
<u>EUPHORBIA</u>	<i>Euphorbiaceae family. Very large, varied group, some caudiciform</i>	Pot Size	Price
aeruginosa	Short, shrubby stems, pale green with red spines & edges	6.5	£3
ankarensis	Short brown stems with bell like pink flowers appearing before the hairy leaves	6.5	£9.50
bupleurifolia	Pine cone like stem with 10cm long leaves radiating from the top. Choice species!	6.5	£9.50
buruana	Blue grey stems radiating from tuberous roots. Slightly tender, prefers above 10°C	8.5	£5
cap-saint-mariensis	Tuber forming with radiating arms, dark green leaves. Prefers a shady position.	6.5	£8.50
decaryi v. decaryi	Type species. Likes warmth & shade, wavy red/green leaves	6.5	£3
decidua (FEW)	Deciduous arms radiating from a conical tuber. Seldom offered SCARCE!	8.5	£29.50
esculenta	Medusae type with fat, radiating arms. Nicer than inermis!	8.5	£4
francoisii	Tuberous root with short arms & multi-coloured leaves, choice	6.5	£6.50
gottleibei	Crown of thorns type plant with thin grassy leaves and multitude of red flowers	6.5	£8.50
grandicornis	A monster! Strongly indented stems with robust thorns - tender	10.5	Sold
groenwaldii	Grey, twisted stems from a tuberous root	6.5	£8.50
meloformis	Similar to E. obesa but ribs more pronounced and flower stems retained like species	6.5	£2
obesa	Red brown to dark green dumplings, largest about the size of a large apple!	6.5	£3
officinatum	Short columnar plants, dark green, white spine pairs. From Morocco	8.5	£3
opuntoides	Green opuntia like stems radiating from tuberous roots. Slightly tender, min 10°C	6.5	Sold
rossii	Crown of thorns type, red flowers and very thin leaves on strongly spined stems	6.5	£9.50
sepulta (grafted)	Tiny clustering stems with grey markings at rib edges. On short E canariensis stocks	8.5	£6
sp. Marx 211	Medusae type, new heads form at the end of each radiating arm. Unusual appearance!	6.5	£4
suzannae	Tiny clustering heads with short green tubercles	10.5	£5.50
<u>FOCKEA</u>	<i>Asclepidaceae, massive tuber forming plants</i>	Pot Size	Price
edulis	Forms large caudex & lots of vine with age, milky sap is harmless	8.5	£4
multiflora	Similar caudex to above, but larger and with larger rounded leaves	8.5	£4.50
natalensis (Petropentia)	Vining from a twisted tuber. Leaves lanceolate to 10cm long with purple backs	6.5	£4
<u>GASTERIA</u>	<i>We have tried to select the smaller growing forms for our list</i>	Pot Size	Price
armstrongii	Fat, dark green, tongue shaped leaves. Not large growing	6.5	£3
excelsa	Leaves 2.5-3cm wide, dark green with white spots almost in lines	6.5	£2
glomerata EVJ 1054	A dwarf growing plant with pale green smooth leaves	8.5	£2
"Little Warty"	Attractive striped, spotted and warty leaves	6.5	£2
minima	Short stubby leaves, glossy dark green with white spots	6.5	£2

obtusifolia variegata	Bright yellow/white variegation on dark green leaves. Medium growing plants	6.5 : 12	£3 : £4.50
schwickerdtiana	Glassy grey/green leaves. Small growing plants	6.5 : 10.5	£2 : £4
“Smokey”	Smooth grey leaved hybrid with some darker markings. Remains small	6.5	£3
xGastrolea “Green Ice”	Intergeneric hybrid. Stout green/silver leaves with attractive markings	6.5	£4
xGastrolea “Pink Lace”	Pretty pink/grey spotted leaves. Clustering & easy flowering miniature	6.5	£3
xGastrolea “Wonder”	Another intergeneric hybrid. Flattened rosettes of silver leaves, nice!	6.5	£3
<u>GERRARDANTHUS</u>	<i>Cucurbitaciae, caudiciform plants from Kenya/Tanzania Africa</i>	Pot Size	Price
macrorhizus	Slightly columnar caudex becoming globular, with trailing vines & bright green leaves	8.5	Sold
<u>GRAHAMIA</u>	<i>We think this to belong in Portulacacae family – small plants with tuberous roots</i>	Pot Size	price
coahuillense	Reddish leaves on short stems to 8cm long, rising from small caudexes. Pink flowers	6.5	£4
<u>HAWORTHIA</u>	<i>Liliaceae family. Small rosette forming plants, some with attractive “windows”</i>	Pot Size	Price
arachnoidea v. xiphiophylla	Tiny rosettes of bristly, light green, thin leaves. Clustering miniature	6.5	£2
aranaea	Small rosettes of narrow leaves, covered with cobweb like teeth	10.5	£6.50
attenuata v. caespitosa	Thin, dark green leaves with strong white cross banding. Most attractive form	6.5	£2
comptoniana	Succulent triangular leaves, glossy window topped with attractive markings	10.5	£6.50
Decorative hybrids	Crosses including H. maughanii. Almost black, stubby leaves – attractive!	10.5	£6.50
dekenahii	Possibly H. retusa variety. Silky, window topped leaves. Attractive form	6.5	£3
limifolia	Dark olive green, ridged leaves, attractive markings. Forms clusters from stolons	8.5	£4.50
limifolia v. umbomboensis	Plain smooth leaves which go pinkish red in the sun	6.5	£2
koelmanniorum	Bronze red leaves with a crocodile skin appearance. Choice & much sought after	6.5	Sold
maughanii	Much sought after plant, leaves like truncated fingers with flat tops	6.5	£4
McMurtryi	Close to H. koelmanniorum but rarely offered. Leaves shorter and more stumpy	6.5	Sold
mirabilis v. calcarea	Blue green leaves, tapering to short point	8.5	£3
pumila	Stiff upright leaves with bold white dots. Can become large with age	6.5	£3
pygmea	Nice striated and granulated leaf form. Goes pink in good light	6.5	£3
sordida	Granulated, almost black leaves. Choice species, slow growing	6.5	£9.50
springbokvlakense	Thumb shaped window leaves. Much sought after!	6.5	Sold
starkiana	Upright glossy, smooth, bright green leaves tinted with red	8.5	£4
translucens tenera	Nice miniature. Makes rosettes about 4cm diameter of thin “toothed” leaves	6.5	£3
truncata	Freely clustering form, nice markings. Good sized plants	6.5	£3
<u>HOODIA</u>	<i>Asclepidaceae family from Africa – thought to be an appetite suppressant!</i>	Pot Size	Price
gordonii	Spiny blue stems, smelly tubular brown flowers!	8.5	£4
<u>IBERVILLEA</u>	<i>Cucurbit vine from the USA and Mexico</i>	Pot Size	Price
tennissecta	Subterranean caudex, climbing vine. From New Mexico.	6.5	£3
<u>JATROPHA</u>	<i>Euphorbiaceae family from Central America – tender</i>	Pot Size	Price

podagrica	Develops bottle shaped stems. Big round leaves and red flower bracts	8.5	£4.50
<u>KEDROSTIS</u>	<i>Cucurbitaceae from Africa – winter dormant</i>	Pot Size	Price
leloja	Slightly columnar caudex with trailing vines & green flowers	8.5	£7.50
<u>MONADENIUM</u>	<i>Euphorbia family from Africa, some with subterranean tubers</i>	Pot Size	Price
magnificum	Bright blue columns with ginger bristles at the base of the deciduous leaf stems	11.5	£9.50
ritchei	Chunky, short dark green stems with tiny leaves that do not last. Typical flowers	8.5	£4.50
rhizophorum	Small stoloniferous stems with tiny leaves on new growth, typical hooded flowers	6.5	£3
schubei	Narrow tuberculate stems with small green leaves & typical Monadenium flowers	8.5	£3
<u>PACHYCORMUS</u>	<i>Anacardaceae family, the “Elephant Tree” from Baja California</i>	Pot Size	Price
discolor	Bonsai like stems with deciduous leaves which re-grow when watered	6.5	Sold
<u>PACHYPODIUM</u>	<i>Apocynaceae family. Mostly Madagascan plants with interesting shaped stems</i>	Pot Size	Price
brevicaule albiflora	Extremely rare white flowered form. Flatten stems grafted on short P. lamerei stocks	8.5	£18.50
geayi	Fat, spiny dark green stems becoming columnar, with glossy purple backed leaves	11.5	£8.50
rosulatum	Rounded dark green leaves, yellow flowers. Stems just starting to branch	6.5	£4
rosulatum v. gracilis	Thinner dark green leaves, yellow flowers. Stems just starting to branch & flower	6.5	£4
<u>PELARGONIUM</u>	<i>Gerinaceae family. Many of this group are considered caudiciform</i>	Pot Size	Price
cotyledonis	Thickened brown stems with bright green rounded leaves & white flowers	12	Sold
<u>PIARANTHUS</u>	<i>Asclepidaceae or “Milkweed” group of plants – often with smelly flowers</i>	Pot Size	Price
decorus	Short olive/red creeping stems, becoming red in good light. Small growing	6.5	£2
<u>SANSEVERIA</u>	<i>Rhizome rooted group of plants in the Agavaceae family, popular as houseplants</i>	Pot Size	Price
hyacinthioides	Leaves can become up to 45cm long, green with pale green cross bands, red edges	6.5	£3.50
<u>SINNINGIA</u>	<i>Tuberous rooted group of plants in the Begonia (Gesneriaceae) family</i>	Pot Size	Price
leucotrichia (Rechsteinaria)	Soft, silver, “felty” leaves from a small tuber, tubular red flowers	8.5	Sold
iaerae	Soft green leaves, different flowers	6.5	£3
<u>STAPELIA</u>	<i>Asclepidaceae family – often with smelly flowers!</i>	Pot Size	Price
hirsuta	Erect almost hairy stems, reddening in good light. Large growing. Young plants	6.5	£2
<u>UMBILICUS</u>	<i>Crassulaceae family – often with bulbous roots</i>	Pot Size	Price
oppositifolius	Pale rounded leaves from short stems, leaves may be deciduous	6.5	Sold
<u>XERIOSICYOS</u>	<i>Curcurbitaceae family - from Madagascar</i>	Pot Size	Price
danguyi	Stems grow to 50cm long, branching from the base with silvery rounded leaves	6.5	Sold
<u>TILLANDSIAS</u>	<i>Propagated from our own collection, many seldom offered</i>		
andicola	Tiny grey, ladder-like stems. Very unusual	miniature	£1.50
paleacea	Stiff hairy white leaves, ours are clustering	small	£3.50
tectorum	Makes magnificent 20cm globes of feathery leaves. Small plants to grow on	medium	£1.50

uesnioides	Spanish moss. Grows well out of doors from May/September	medium	£2
	Enquire for other Tillandsia species propagated in limited quantity
