Species	Description	Pot Size	Price
<u>ARIOCARPUS</u>	<i>"Living Rock" plants - slow growing & much sought after</i>	cm	GBP
agavoides (<i>Neogomesia</i>)	Narrow dark green tubercles. Flowering size plants now more than 10 years old	6.5	£6
fissuratus	Thick dark green tubercles, develops woolly centre with age. 10 years old	6.5	£7.50
retusus	Nice forms of A. retusus, some from Mesa garden seed - 10 year old plants	6.5	£5
trigonus	Olive green tubercles, sharply pointed at the tips, large yellow flowers, 9 years old	6.5	£5
trigonus fa. Aramberri	Similar to the type but with red/pink flowers – thought to be a retusus form by some	6.5	£5
<u>ASTROPHYTUM</u>	<i>Interesting plants, most are covered with white "spots"</i>	Pot Size	Price
capricorne v. crassispinum	Almost bare body, much thicker, stronger spines. Very nice form	6.5	£3
myriostigma	Flowering size, "Bishops Cap" Some larger plants available from £7.50	6.5	£2
myriostigma v. coahuillense	Dense white coating. Flowering size plants, flowers yellow with a red centre	6.5	£3
myrio. v. quadricostata	Square plants for square pots! Nice 4 ribbed plants, flowering size	8.5	£4
quadricostata v. nudans	Glossy green 4 ribbed plants, no white spots – unusual form	8.5	£4
ornatum	Nice white spotted form with strong brown/yellow spines. Various sizes available	6.5 =>10.5	£2 => £6.50
Senile v aureum	White spotted body covered with twisted yellow/straw coloured spines	12	£7.50
<u>COPIAPOA</u>	<i>We are pleased to offer plants grown from seed obtained on our 2006 trip to Chile</i>	Pot Size	Price
atacamensis	From Botija, about 500m from the ocean. Grey stems cluster with age - FEW	6.5	£4
barquitensis	Non-habitat seed. Red bodied plants when young, straight black spines	8.5	£4
cinerea BH57.01 or BH58.01	Most sought after form. Develops grey body with short black spines – From 2 locations	6.5	£4
columnar alba BH62.01	Develops into white columns with solitary spine from each areole	6.5	£4
dealbata BH68.01	Grey body with long spines, clustering. Makes nice plant - FEW	6.5	£4
fiedleriana BH69.01	Olive green/red bodied plants, short spines, compact clustering growth - FEW	6.5	£4
grandiflora BH62.02	Green body becoming grey with age. Short spines & larger flowers	6.5	£4
haseltoniana	Non-habitat seed. Gold body when young, becomes chalky with age. Yellow spines	8.5	£4
haseltoniana BH52.01	Olive green bodies when young, becoming chalky with age. "gigantea" form	6.5	£4
humilis v longispina	Black bodies, lower spines short, upper ones long black and straight. Clustering plants	11.5	£8.50
hypogea	Cultivated form, green/brown body often with interesting wrinkled skin, yellow flowers	12	£6.50
tenebrosa BH55.01	A giant up to 1mtr tall, Cinerea like & clustering. From the mountains above Taltal	6.5	£4
<u>CORYPHANTHA</u>	<i>Mammillaria family. Compact plants from Mexico & USA</i>	Pot Size	Price
andreae	Dark glossy green body, large yellow flowers	6.5	£2
bisbeeana (<i>Escobaria</i>)	Globular plants untidy pink coloured spines, Cochise Co. Arizona	6.5	£3
cornifera	Clustering plant from the Big Bend area of Texas	6.5	£3

nelliae (<i>Escobaria</i>)	Pretty clustering miniature, red & straw coloured spines, pink flowers	6.5	£2
sneedii (<i>Escobaria</i>)	Dwarf plants making clusters of many heads, dense white spines	6.5	£2
<u>DISCOCACTUS</u>	<i>Brazilian plants – unless grafted need ericaceous compost and high winter temps.</i>	Pot Size	Price
boomianus (<i>grafted</i>)	Small headed form, clustering with short straw coloured spines	6.5	Ready August
ferricola (<i>grafted</i>)	A giant of the group, making bodies up to 30cm diameter – large white flowers	6.5	Ready August
<u>ECHINOCACTUS</u>	<i>Generally large growing species, a few smaller choice ones</i>	Pot Size	Price
grusonii	Popular “Golden Barrel” - or more unkindly “Mother in Law’s seat”!	10.5	£5
grusonii v. inermis	“brevispina” form, attractive short spines on the typical globular body	10.5	£9.50
ingens	The “giant” echinocactus, grows to over 1mtr in height in habitat	6.5	£2
<u>ECHINOCEREUS</u>	<i>Usually clustering, from miniatures to large clumps over 1m</i>	Pot Size	Price
adustus	Pretty black & white pectinate spined plants with large flowers. Flowering sized	8.5	£4
amoenus JLH950741	Short, tap rooted plants with large pink flowers. From wet grassy meadows!	6.5	£3
brandegei	Multi-stemmed plants with white & black dagger like spines. Needs to be large to flower	6.5	£3
de-laeti	Long, white hair like spines, Slow to flower	8.5	Sold Out
engelmannii JLH950812	A northern form with black & white spines, cold tolerant	6.5	£2
fasciculatus	Form of E. engelmannii from central Arizona, golden spines	10.5	£5
fendleri var. eremicus	Form with brown/white spines. Not a lot different to normal form!	8.5	£4
fitchii	Short columnar plants with dense white/grey spines, easy flowering large pink flowers	8.5	£4
fitchii v. albertii	Similar to above, but much darker spines, easy flowering large pink flowers	8.5	£4
gentryi Lau 087	“Cucumber” - like stems, tiny spines, flowering size plants	10.5	£5
knippelianus v. reyesii	Fat bodies, stiffer spines. Larger, deep pink flowers from the centre of the plant	8.5	£4
lindsayi	Strongly spined plant from Baja California. We find it slightly tender	6.5	£3
morricallii	A spineless E. scheerii type. Flowers low down on the sides of the pale green stems	8.5	£4
pectinatus v. rubra	Stunning red spines on our larger flowering sized plants. Easy flowering form	6.5	£2 : £3
pulchellus v. sharpii	White flowered, short bristly spines, more care with watering required	6.5	£3
reichenbachii	Small growing plants with dense spines, easily produced large pink flowers	6.5	£4
rosei (<i>Oro Grande form</i>)	Easy flowering plants from a population with many flower colours	8.5	£4
stramineus JLH950764	From south of Samalayuca Mexico. Glassy white spines, robust stems	10.5	£5
triglochidiatus JLH950825	Northern form, cluster forming plants. Quite hardy, spines typical of triglochidiatus	10.5	£5
triglochidiatus inermis	Totally spineless form! Much kinder on the fingers when re-potting!	8.5	£5
weinbergii	Short pectinate spines on a tap rooted body. Pink flowers from the sides of the plant	8.5	£4
<u>ECHINOFOSSULOCACTUS</u>	<i>Small, globular plants with thin ribs and bi-coloured flowers</i>	Pot Size	Price

<i>lloydii</i>	Long, thin papery spines with pink/white flowers – flowering April/May	6.5	£2
<i>phyllacanthus</i> JLH950745	Many thin ribs, thin spines, just flowering size – flesh/white coloured flowers	6.5	£2
<u>ECHINOPSIS</u>	<i>See Lobivia</i>		
<u>EPITHELANTHA</u>	<i>Mostly miniatures with pink flowers & red fruits</i>	Pot Size	Price
<i>micromeris</i>	From near Mud Mountain, New Mexico. Coarse white spines, pink flowers	6.5	£3
<u>FEROCACTUS</u>	Small to large growing "Barrel Cacti" from Mexico & SW USA	Pot Size	Price
<i>emoryi</i>	Nice blue-bodied plants with vibrant red spines – grows large	6.5	£2
<i>gracilis</i>	Bold red spines, dark green, plant body. Can grow to around football size	10.5	£5
<i>herrerae</i>	Large growing plant, strong re-curved brown spines, yellow flowers	8.5	£4
<i>latispinus</i>	Flat growing, broad yellow spines. Flowers pink/white, Some ex 16cm pots @ £10	8.5	£4
<i>macrodiscus</i>	Flat growing plant with acute ribs. Flowering size plants ex 18cm pots @ £25	8.5 : 12.5	£4 : £6.50
<i>robustus</i>	From Tecomachalco Mexico. Makes small heads and clusters profusely	8.5	£4
<i>viridescens</i>	Southern California & Baja. Produces green flowers while still small	6.5	£2
<u>GEOHINTONIA</u>	<i>Relatively recent discovery from Mexico. Monotypic genus</i>	Pot Size	Price
<i>mexicana</i>	Blue/grey body, many acute ribs, tiny white spines, purple flowers. On own roots	6.5	£7.50
<u>GYMNOCACTUS</u>	<i>Closely allied to Turbinicarpus but generally more spiny</i>	Pot Size	Price
<i>beguinii</i>	Small plants, dense black & white spines, large purple/pink flowers	6.5	£4
<i>booleanus (grafted)</i>	Originally described as a Turbinicarpus, spination etc. looks more like a Gymnocactus	6.5	Sold Out
<i>ysabellae</i>	Globular, golden spines, growing to 10cm. Pink/white flowers. Flowering sized plants	6.5	£4
<u>GYMNOCALYCIUM</u>	<i>South American group, mostly small flattened plants</i>	Pot Size	Price
<i>delaetii</i>	Small flattened plants with blue/grey skin and yellow spines. Slow growing	6.5	£3
<i>hamatum</i>	Strongly tuberculate, brown bodied plants with dark brown curved spines	8.5	£4
<i>mihanovichii</i>	Purple/red bodies, white spines, pink flowers. A popular sort	6.5	£2
<i>piltzorum</i> P28	Flattened brown body with erect stiff spines	6.5	£2
<i>ragonesii</i>	Dwarf brown bodies, tiny spines, flesh-coloured flowers, slow!	6.5	£3
<i>saglione</i>	Large rounded tubercles, long curved spines. Grows to football size!	8.5	£4
<u>HAMATOCACTUS</u>	<i>Probably should be included with the Ferocactus group</i>	Pot Size	Price
<i>hamatacanthus</i>	Long red & white spines on a globular plant. From the Big Bend area of Texas	8.5	£4
<i>setispinus</i>	Small globular plants with pale yellow spines, yellow flowers. From Texas hill country	8.5	£4
<u>LEUCHTENBERGIA</u>	<i>Confuses many beginners with its un-cactus – like appearance</i>	Pot Size	Price
<i>principis</i>	Pink/blue "fingers" with long papery spines. Huge yellow flowers	8.5 : 12.5	£4 : £9.50
<u>LOBIVIA</u>	(inc. Chamaecereus) <i>Mostly small growing cacti. Free flowering & easy cultivation.</i>	Pot Size	Price
<i>andalgala</i>	Small headed plant clustering with short, red/brown spines. Flowers at 2cm diameter	6.5	£3
<i>bruchii</i>	Plants forming large "barrels" with bright yellow spines	8.5	£4

dobeana	Clustering Echinopsis type, brick red flowers	6.5	£3
oxygona (Echinopsis)	Typical Echinopsis in appearance – grown from habitat seed from Argentina	8.5	£4
“Strawberries & Cream”	Small dark green bodied clustering plants, flowering easily – red/cream flowers	6.5	£3
subdenudata (Echinopsis)	Fat green bodies with large woolly areoles, flowers at small size	6.5 : 10.5	£2 : £5
sylvestrii hybrid #2	Possibly a Lobivia hybrid. Robust stems, different red flower. Easy flowering!	6.5	£2
sylvestrii cristate	Stems start normal but then crest at the tips. Easy flowering form	6.5	£2
<u>LOPHOPHORA</u>	<i>The Czech. Society has published an interesting booklet on this group</i>	Pot Size	Price
echinata diffusa	Green body, white to cream coloured flowers. A few larger plants are available	6.5	£4
fricci	Larger flowers, sometimes red. May be the same as L. w. decipiens - small plants	6.5	£4
jourdaniana	Clustering dark, blue green body, tiny spines on new growth - flower almost red	6.5	£6
williamsii	The common peyote. Spineless “dumplings” with tufts of hairs. Pink flowers	6.5	£4
williamsii caespitosa	A densely clustering form with many small heads around a larger, flowering sized one	6.5	£6
<u>MAMMILLARIA</u>	<i>Miniature plants to large clustering sorts, generally free flowering</i>	Pot Size	Price
albilananta	Pretty, short white spined plants with dark pink flowers & lots of wool in the axils	8.5	Sold Out
camptotricha	“Birds nest” form with long, thin yellow, bristly curved spines	6.5	£2
candida	Solitary globular plants that can reach football size. Pink & white spines, pink flowers	8.5	£4
celsiana	White radial spines, yellow centrals. Plant globular while young	6.5	£2
elegans	Attractive short columnar plants, white radial, black central spines. Deep red flowers	8.5	£4
formosa	Flat growing plants, white radial, black central spines. Deep pink flowers	6.5	£2
graesneriana	Slightly columnar plants covered with short yellow spines	10.5	£5
hidalgensis var. inermis	Unusual, pale green spineless plant, dark red flowers!	8.5	£4
huitzilpotchlii	Solitary, olive green stems with short brown pectinate spines & tiny red flowers – Nice!	6.5	£4
lasiacantha	The “Texas Golf Ball” – small solitary white globes with pink flowers	6.5	£4
lauri	Short white spined form, many deep pink flowers. Starting to form clusters	8.5	£4
magnifica cristate	Contorted stems covered with fine white spines, occasional hooked centrals	8.5	£4
magnimamma	Glossy dark green body, short spines. Will make large clusters eventually	8.5	£3
marksiana	Nice globular plants with bright yellow spines & flowers	8.5	£4
matudae	Taller growing plant, olive green body with pectinate brown spines.	6.5	£2
napina	Big dark red flowers. Short, glassy spines, large taproot. Flowering April/May	8.5	£6
nejapensis	Globular, clustering with age. Long white spines, yellow flowers	8.5	£4
parkinsonii	Eventually clustering, stems covered with stiff white spines	8.5	£4
pectinifera	<i>(Solisia pectinata)</i> Beautiful white spined plants on own roots. Another “golf ball”!	6.5	Sold Out

scheideana	Tap rooted. Golden yellow spines, dark green body, yellow flowers	8.5	£4
senilis (<i>Mammilopsis</i>)	Fine covering of hooked white spines. Large red flowers. Cold hardy	10.5	£5
“Uno Pico”	From a <i>M. magnifica</i> sport, solitary central spines, red flowers	8.5	£4
viescensis	Similar to a <i>lasiacantha</i> but with occasional strong straight central spine	6.5	£3
<u>NEOPORTERIA</u>	<i>AWC = Alan Craig; BH = Burke/Henshaw collection nos</i>	Pot Size	Price
chilensis	From various locations, red/green bodied plants, short, stiff yellow spines. AWC seed	8.5	£4
coimasensis AWC24, 553	Green bodied plants dense bristly straw/black spines. Two locations	8.5	£4
curvispina? BH01.01	Dark bodied plants, spines curving upwards. From near Volcan, Chile	6.5	£3
esmeraldana FK775	Large tap roots, tiny, almost black body, small orange/brown spines	6.5	£2
gerocephala	Globular plants with long bristly, intertwined spines, pink/white flowers	8.5	£4
huascoensis BH69.03	Almost black body with short black spines. From above Huasco	6.5	£3
multicolor	Dense straw coloured spines becoming long with age. Pink/white flowers	10.5	£5
napina	Interesting plants with large tap root, olive green body, tiny spines, large pale flowers	6.5	£4
napina v. spinosior AWC503	Body more red, spines more prominent, otherwise quite similar	6.5	£3
nigrihorrida	From various locations, glassy black to straw coloured spines	8.5	£4
paucicostata BH53.01	Almost black stems with short black spines – small, pretty plants	6.5	£3
subgibbosa	Plants from several different locations, mostly yellow spines	8.5	£4
<u>NOTOCACTUS</u>	<i>Generally easy growing & flowering plants - good for beginners</i>	Pot Size	Price
buiningii	Blue-green body, thin ribs, white spines. Large yellow flowers. Slightly tender	8.5	£4
claviceps	Similar to <i>leninghausii</i> but spination stiffer and not as dense, plants more globular	10.5	£5
erinacea	Dark bodies, short stiff spination, plant globular with yellow flowers	6.5	£2
leninghausii	Popular yellow spined plant, flowers when about 15cm high	8.5	£4
leninghausii albispina	Novelty! Unusual white spined variant. Only offered by us once before	8.5	£4
magnificus	Blue body, yellow spines, yellow flowers. Forms clusters with maturity	8.5	£4
turececkianus	Easily mistaken for <i>submammulosus</i> . Longer, more papery spines, bigger flowers	10.5	£5
werdemannianus	Short columnar plants with erect yellow spines on light green body	10.5	£5
<u>OBREGONIA</u>	<i>4 year old plants on their own roots, shade loving</i>	Pot Size	Price
denegrii	Rhomboid shaped grey green tubercles with short, straw coloured spines, tap rooted	6.5	£3
<u>PARODIA</u>	<i>Globular shaped plants from Argentina, from miniatures to barrel proportions!</i>	Pot Size	Price
auriecentra	Dark green body covered with orange/yellow spines. Big plants – check postage!	20	£25
<u>PELECYPHORA</u>	<i>10 year old plants on their own roots, very slow growing</i>	Pot Size	Price
asseliformis	Hatchet shaped tubercles + tiny grey spines, big tap roots!	6.5	£7.50
<u>PYGMAECEREUS</u>	<i>Short clustering plants - attractive</i>	Pot Size	Price

akersii	Dark bodies + tiny grey spines, nocturnal white flowers!	6.5	£3
<u>PYRRHOCACTUS</u>	<i>South American globular plants – some to barrel cactus proportions</i>	Pot Size	Price
bulbocalyx	(Eriosyce) very slow growing plants with red spines. From Argentina. 5yrs old.	6.5	£4
ceratistes v. ihotskyana	(Eriosyce) grafted on short stocks. Makes fiercely spined globes up to football size	8.5	£6
<u>REBUTIA</u> including <i>Aylostera</i> .	<i>Small clustering plants, free flowering & easy cultivation. More unlisted –ask!</i>	Pot Size	Price
breviflora (<i>sulcorebutia</i>)	Olive green body / straw coloured pectinate spines. Forms clusters 3cm dia. heads	6.5	£2
fabrisii v. aurieflorea	Tiny clustering heads, fine white spines, yellow flowers	8.5	£4
fabrisii v. nana	Tiny clustering heads, longer white spines, orange flowers	8.5	£4
heliosa v. condorensis RH283	Coarser spination - attractive plants. Free flowering	8.5	£4
heliosa RH259	Pale green body, longer, untidy silvery spines	8.5	£4
perplexa	Light green bodies with straw coloured spines. Nice pink flowers.	6.5	£2
pulvinosa	Similar to fabrisii but spines shorter and stiffer, heads larger	8.5	£4
wrightiana	Similar to perplexa but larger bodies & more untidy spination. Orange flowers.	6.5	£2
Mixed hybrids	From a collection we can offer a range or free-flowering hybrids	10.5	£5
Mixed hybrids	As above – flowers include whites, pinks, orange and bicolours	12	£7.50
Mixed hybrids	As above – contact us for specific flower colours	16	£9.50
<u>STROMBOCACTUS</u>	<i>Disk shaped plants inhabiting clay walled canyons in central Mexico</i>	Pot Size	Price
disciformis	Plants from 3cm diameter upward. Our oldest were sown in 1989!	6.5 : 8.5	£3 to £10
<u>SUBMATUCANA</u>	<i>Mountain plants from South America</i>	Pot Size	Price
paucicostata	Long twisted spines on short clustering bodies. Red flowers, alpine horn shape,	6.5	£2
Asterium	Very similar in form to S. madisoniorum but with long twisted spines/red flowers.	6.5	£3
<u>THELOCACTUS</u>	<i>A wide ranging group from Texas to Queretaro in Central Mexico</i>	Pot Size	Price
bicolor	Red and white flattened spines. Make huge pink flowers when 5-6cm.	6.5 : 8.5	£2 : £4
bicolor v. bolaensis	White spines on clustering plants. Flowers smaller than the type	8.5	£4
bicolor v. flavidispina	Fine straw coloured spines on clustering, smaller plants than the type	8.5	£4
bicolor v. schottii	Long twisted spines. Flowers larger than the type. Beautiful form from Lajitas Texas.	6.5	£3
bicolour v. potsii	Short twisted spines. Flowers larger than the type, petals fold back over the plant.	6.5	£3
conothele	Olive green, prominently tubercled plants, long black and white spines! Flowering sized plants.	8.5	£4
conothele v. aurantiacus	White radial spines with darker centrals. Flowers orange/yellow – nice form!	8.5	£4
hastifer	Columnar plant, looks a bit like Gymnocactus subterraneus! Queretaro, Mexico	6.5	£2
hexaedrophorus	Flat grey bodies with big taproots. Satin white to pink flowers.	8.5	£4
heterochromus	Looks like a fat bicolour. Beautiful flowers when plants reach 8cm diameter.	6.5	£3
lausseri	Similar form to T. bicolor but spines brown & white. Flower pink/white	6.5	£3

matudae	Olive green body, large tubercles, deep purple/pink flowers	6.5 : 8.5	£2 : £4
McDowellii	Covered in dense glassy white spines. Pink flowers – beautiful plants	8.5	£4
nidulans	Blue/grey body, long curved black/grey spines. Pink flowers.	8.5	£4
rinconensis	Blue/grey body, long curved black/brown spines. Pink flowers.	8.5	£4
<u>TRICHOCEREUS</u>	<i>Widespread group from South America, some grow to tree like proportions</i>	Pot Size	Price
atacamensis	Large growing, matt green plants with yellow spines – can grow to 5m high.	8.5	£4
chilensis AWC201	Slim columnar plants with stiff yellow spines.	12	£8.50
terscheckii	Starting as globular plants, becoming stout columns with age. Fierce spines!	8.5	£4
<u>TURBINICARPUS</u>	<i>Miniature cacti from central/northern Mexico mostly found growing among rocks</i>	Pot Size	Price
alonsoi	Dark green, stout tubercles with upright spines. Purple red flowers	6.5	£4
dickisoniae	Tiny stems, white radials, black centrals, white flowers	6.5	£3
jauernigii	Chalky grey plant body, looks like a black spined Lophophora!	6.5	£4
klinkerianus	Green/grey plant body, twisted black spines – cream/yellow flowers.	6.5	£6
krainzianus	Long bristly spines, similar to T. psedomacroechele	6.5	£4
krainzianus v. minimus	Weird! Long thin stems on large taproot. Small yellow flowers	6.5	£4
lophophoroides	Biggest growing of the Turbinicarpus group, also the easiest to kill! Pink flowers	6.5	£3
lophophoroides cristate	Interesting form, grafted on short stocks. Produces normal pink flowers along crest.	8.5	£6
macrochele	Small plants, curly dark spines, almost flat tubercles & big taproot	6.5	£4
polaskii	Nice fat plants with corky spines, up to 3cm. diameter	6.5	£4
pseudomacroechele	Flowers pink to white! Mature plants with large tap roots.	6.5	£4
pseudopectinatus	Often mistaken for a Pelecyphora - was Normanbokea.	6.5	£4
pseudopectinatus cristate	Grafted – makes nice brain coral shapes and has normal flowers along the crest.	8.5	£6
swobodae	Small dark reddish/grey body, elongate tubercles, black incurved spines	6.5	£5
valdezianus	<i>(Was Normanbokea)</i> Flowers can be pink or white, spines are quite plumose	6.5	£3
<u>OTHER SUCCULENTS</u>	<i>Due to the severe winter we are not able to offer our usual range of caudiciforms</i>		
<u>ADROMISCHUS</u>	<i>Crassulaceae family – succulent leaves from semi-caudiciform bases</i>	Pot Size	Price
hemisphaericus	Short spreading branches densely covered with mottled red/green leaves, tuberous root	6.5	£2
cristatus	Leaves with a wavy tip, fine root hairs between the leaves, clustering.	6.5	£3
<u>AGAVE</u>	<i>From miniatures to giant plants, some are almost hardy in the UK</i>	Pot Size	Price
colimana	Soft narrow leaves with pale centres, curling fibres at the edges. From Colima Mexico	6.5	£3
leopoldii	Magnificent rosettes of narrow leaves with curling fibres at the edges – attractive!	8.5	£5
parrasana	From Parras, Mexico. Grey leaves with attractive teeth and imprinting on the leaves	16	£6
parryi variegata	Compact form with long japanese name! Attractive white/yellow variegation.	8.5	£5
schottii	A filiferous type with white fibres at the dark green leaf edges	10.5	£5

<i>stricta</i>	Will eventually form a hemisphere of thin stiff leaves up to 1mtr diameter	8.5	£4
<i>univittata</i> quadricolour	Lophantha type with highly variegated red/yellow/green leaves - FEW!	8.5	Sold Out
<i>utahensis</i>	Narrow grey leaves with a long terminal spine. Cold but not damp tolerant!	8.5	£4
<i>victoria regina</i>	Stiff dark green leaves with white markings, justifiably popular. Large – check postage!	25	£20
<u>ALOE</u>	<i>We are propagating many choice Aloe hybrids, some from our own crossings</i>	Pot Size	Price
“Bedford’s Beau” (P Bedford)	UK hybrid using <i>A. deltoideodonta</i> as parent. Vey pretty & dwarf –easy flowering!	6.5	£4
“Black Gem”	Once common and quite popular. Now overshadowed by the more recent hybrids.	8.5	£4
“Blizzard”	One of ours! Storm blue leaves covered with dense white spots. VERY FEW!	6.5	£5
“Brasshat”	Nice brassy/bronze colour leaves – flowers at a small size like many new hybrids.	6.5	£3
<i>deltoideodonta</i>	Not sure if this is actually variety <i>contigua</i> – broad leaves with white spots.	8.5	£4
<i>descoingsii</i>	Pretty, dwarf Madagascar species with spotted triangular leaves	6.5	£2
“Dos” (x Lizard lips)	Second of our own hybrids using Lizard Lips – nice toothy/mottled leaves	6.5	£3
“Hey Babe” ISI 89-36	Hybrid of <i>A. descoingsii</i> . Leaves are similar but larger and blue-grey. Red flowers	8.5	£4
“Lizard Lips”	An early California hybrid and justifiably popular – almost always in flower!	6.5	£3
<i>melanacantha</i>	Dark green leaves with prominent black “teeth” at the leaf edges.	8.5	£4
“Midnight” ISI 94-18	Dark red/black leaves, occasional white spots. Dwarf American hybrid. Free flowering	6.5	£3
“Midnight exchange”	UK hybrid, offspring of above. Stunning almost black leaves with white teeth	6.5	£3
“Midnight Feast” (P.Bedford)	Another offspring of above. Pretty dark leaves with numerous white dashes	6.5	£3
<i>parallelifolia</i>	Thin, upward pointing bronze coloured leaves in opposing pairs	6.5	£3
<i>plicatilis</i>	Attractive toothless blue leaves in a fan shape. Flowers at about 25cm high	6.5	£4
<i>rauhii</i> x <i>somaliense</i>	Broader leaves than <i>A. rauhii</i> & attractively marked.	6.5	£3
“Snowflake”	Extremely white leaved hybrid. Slightly tender, clustering with age. Free flowering	6.5	£3
“Seis” (x Lizard Lips)	Our sixth cross with Lizard Lips. Olive green leaves with longitudinal white dots	6.5	£4
“Whiteout”	Another of ours! <i>Rauhii</i> like leaves covered with dense white dots. VERY FEW!	6.5	£5
<u>ANACAMPSEROS</u>	<i>Portulacaceae</i> family – small plants with slightly tuberous roots	Pot Size	Price
<i>telaphiastrum</i>	Green to brownish leaves with bristly hairs from the bases, stems to 5cm. Pink flowers	6.5	£2
<u>BEAUCARNEA</u>	<i>Agavaceae</i> . The “Pony Tail” palm	Pot Size	Price
<i>guatamalensis</i>	Thin leaves up to 60cm long from a rounded woody caudex. Flower at about 1.5m high	10.5	£5
<u>CALIBANUS</u>	<i>The leaves of this plant are used for thatching in Mexico!</i>	Pot Size	Price
<i>hookeri</i>	Thin, sharp edged leaves from a corky caudex. From our own seed!	8.5	£4
<u>ECHEVERIA</u>	<i>We specialise in the large-headed, brightly coloured hybrids</i>	Pot Size	Price
“Berkley Wright”	Pale blue/green leaves with crinkled red edges. Grows to 25cm diameter. FEW	8.5	Sold Out

“Blue Curls”	Smaller growing. Short blue spoon shaped leaves with wavy pink edges.	8.5	£5
“Bittersweet”	Spoon shaped deep red leaves with wavy edges. One of the nicer ones!	8.5	£6
“Carnival”	Purple/pink leaves with almost white crinkly edges. Can grow to a good size.	8.5	£5

truncata	Freely clustering form, nice markings. Good sized plants	6.5	£3
venosa fm.	Short triangular leaves, translucent 'windows' in the tops.	6.5	£3
x maughnii	Nice plants with features of maughnii and truncate. Propagated from variegated plants.	8.5	£5
HOODIA	<i>Asclepidaceae family from Africa – thought to be an appetite suppressant!</i>	Pot Size	Price
gordonii	Spiny blue stems, smelly tubular brown flowers!	8.5	£4
MONADENIUM	<i>Euphorbia family from Africa, some with subterranean tubers</i>	Pot Size	Price
schubei	Narrow tuberculate stems with small green leaves & typical Monadenium flowers	8.5	£4.50
PELARGONIUM	<i>Species plants from Africa, some with subterranean tubers</i>	Pot Size	Price
tetragorum	Narrow, angular stems with small brightly coloured leaves in the axils.	6.5	£4
acetosum	More robust growing, should form a caudex like stem with age.	6.5	£4
PLECTRANTHUS	<i>Nettle family, very decorative plants</i>	Pot Size	Price
oertendahlia	Leaf backs and stems purple, leaf tops silvery. Attractive small shrubby plants.	6.5	£4
STULTITIA	<i>Asclepidaceae (Stapelia) family, thin stemmed branching plants</i>	Pot Size	Price
hardyi	Purple, narrow creeping stems, darker markings. Small smelly flowers!	6.5	£3

Notes for customers purchasing plants by mail order:

Plants are sent bare root and need to be potted in a well-drained compost such as John Innes no. 2 or a General Purpose potting compost. If possible add a little coarse grit and coarse sand to improve the drainage. Do not over pot, too large a plant pot will stagnate growth.

Newly repotted plants should NOT be watered for about a week after potting. This is to allow any damaged roots time to heal before watering starts and is contrary to the treatment for normal houseplants.

Plants should be fed at every watering with a ½ strength liquid feed such as Chempak Cactus Feed, Chempak No. 8, Phostrogen or Miracle Grow. For Cacti, water should be withheld over winter, for Succulent plants it should be reduced.

Good luck with your plants!
